Sounds good, thank you. I will make sure that one makes it in.

Best,
Kate

Good Afternoon, Kate!

Thanks for reaching out, we were wondering what has happened! It was a pretty long issue though so I had just figured it didn't fit in the space.

The event has already occurred, so there is no need to put it in the next issue. We are going to be putting in a request later this week for another workshop event for grant outputs later in the month, so just be on the lookout for that one.

Best,
Gwen

Sorry, this is the submission I am referring to:

firstname - Gwendolyn

lastname - Sibley

email - grsibley@ksu.edu

headline - Data Curation for Agricultural Researchers Workshop

contentyouaresubmitting - Please join us at the library for a workshop which will teach you how to make agricultural data machine readable, FAIR, and AI ready. The workshop, sponsored by ID3A, will be on two different days, with the first being May 1, 2026 and will focus on the FAIR Data principles as they relate to agricultural data. The second is May 29th and will be a hands-on workshop looking at real-life examples for researchers to bring and examine. Each workshop will be from 11:00am-3:00pm and will provide a lunch to all registrants. Researchers may register online for the May 1st workshop. https://cal.lib.k-state.edu/event/16712635. For any questions you may email Gwen Sibley (grsibley@ksu.edu) the data librarian.

Subject: Research Weekly submission

Hi Gwendolyn,

Apologies for our oversight, but this submission was not included in the Research Weekly on 4/29. Would you like us to run it in this week's edition?

Thank you,
Kate
