Agreed on all counts. Now that we're actually starting to get a sense of what we're doing and where/how the $ would flow, it's time to let ORD know it's in the works. Let's see how much money we have available, which will drive how much we have for OEIE & OPE. Feel free to start things up with ORD (I usually start by pinging Kim Rewinkel and following her guidance, not sure who you usually work with).

Regards,
Dan

**Subject:** FW: NSF proposal OAK-AI Hub

Dan,
Forwarding this your way since I think you and I should coordinate before I say something stupid to our colleagues.
Since this is a limited-submission we'll need to notify ORD; have you done that? if you haven't I'm happy to send an email their way. I have the impression they know this is coming, but best to dot our T's and cross our I's.

I'm also concerned about this groups attention to points 4 and 5 in the RFP; What do you think we should offer up from K-Sate in that regard? The HPC Carpentries, Library Carpentries and efforts in Sunderland might make our sub-award strong.

I'm also thinking whether we should bring OEIE/Piestar into the conversation for evaluation, and OPE for a coordinated open data management effort.
Let me know what you think.

**Subject:** Re: NSF proposal OAK-AI Hub

OAK-AI Hub team,

Attached are the transcript and chat log from today's meeting (Wed Sep 9 10am).

One question from the chat that didn't get addressed in the discussion:

"What if the single sub award entity was an industrial partner (ie LLC or not for profit)?"

I'm going to recommend that we NOT make subawards to any entity that doesn't fit the description below, for reasons described below.

The AI Infrastructure Hubs solicitation/program announcement says this:

"Proposals may only be submitted by the following:

* Institutions of Higher Education ....

* Non-profit, non-academic organizations: Independent museums, observatories, research laboratories, professional societies and similar organizations located in the U.S. that are directly associated with educational or research activities."

https://www.nsf.gov/funding/opportunities/us-national-science-foundation-state-regional-artificial/nsf26-513/solicitation

The solicitation DOESN'T actually say that another kind of entity,
such as a for-profit company or not-for-profit organization
(other than the kind listed in the second bullet point above)
would be automatically ineligible to receive NSF funds for this project.

But my guess is that budgeting funds for such an organization
would be discouraged and could result in the NSF insisting on
having any such organization(s) being cut from the budget
before an award is finalized.

Likewise, it could result in a negative impression from the reviewers,
meaning that doing that would lower the probability of getting the grant
at all.

---

This question came up in the context of exploring the option of
having a single subawardee organization that disburses funds to
individuals directly, instead of having a subaward for each
institution that receives budget/has personnel who receive budget.

This idea was offered as a mechanism for the following:

(a) to reduce the amount of "double overhead" attributed to
subawards (see below),

AND

(b) to give greater flexibility on adjusting budgeting
during the grant period,

AND

(c) to reduce paperwork for the lead institution
(each individual subaward requires annual paperwork).

---

Regarding "double overhead:"

Under NSF rules, the lead institution (OU in this case) has to pay
Overhead/Indirect Costs/Facilities & Administration on
the first $25K of each subaward, and the subawardee institution

has to pay Indirect Costs on the full subaward.

So if we have, say, 10 subawardee institutions receiving at least $25K of subaward (11 institutions total including the lead institution), then we'd have to pay an extra $137,500 of Indirect -- admittedly ~1% of total budget, but still:

10 subawardee institutions x first $25K of subaward x 55% Indirect

https://www.ou.edu/content/dam/research-norman/docs/grants/SignedRateAgreement.pdf

Note that the AI Infrastructure Hubs program explicitly disallows "collaborative proposals," where each participating institution nominally has its own mini-proposal with its own independent budget, but the mini-proposals have a number of shared documents, especially the project description and project summary, and there's no double overhead.

You can see how a collaborative proposal would be attractive in a case like this -- oh well.

**Subject:** Re: NSF proposal OAK-AI Hub

Below are the chat comments from this past Wednesday's OAK-AI Hub call.

---

2026-09-02 10:10:32 From Christopher Fennell to Everyone:
Link is here:

2026-09-02 10:10:34 From Christopher Fennell to Everyone:
https://www.nsf.gov/events/nsf-state-regional-artificial-intelligence-infrastructure

2026-09-02 10:17:02 From Mickey Slimp, GPN to Everyone:
Arkansas may be able to leverage the West Memphis Google Data Center.

2026-09-02 10:23:28 From Mickey Slimp, GPN to Everyone:
Dell, Cisco, HPE (Juniper), Nokia

2026-09-02 10:24:44 From Cari Keller - NSU to Everyone:
In Tulsa, there is Tulsa Innovation Labs. Its a tech-led economic development organization with an AI focus.

2026-09-02 10:27:10 From Richard Reif - NSU to Everyone:
Could the tribes be considered as "Regional Stakeholders"? Much like industry, they can hire many of our grads and help shape curriculum.

2026-09-02 10:27:18 From Zahed Siddique to Everyone:
Home - Oklahoma Manufacturing Alliance

2026-09-02 10:27:31 From Henry Neeman to Everyone:
Walmart

2026-09-02 10:27:48 From Henry Neeman to Everyone:
Pryor OK Google data center

2026-09-02 10:28:16 From Emily Hendryx Lyons to Everyone:
Would partnerships like with Tinker AFB be acceptable? Or would military be outside the scope?

2026-09-02 10:28:21 From Henry Neeman to Everyone:
Arkansas system is connected with Walmart

2026-09-02 10:28:32 From Christopher Fennell to Everyone:
Garmin in Olathe, KS (my sister works there 🙂)

2026-09-02 10:28:36 From Henry Neeman to Everyone:
I'm pretty sure military is in scope, under government.

2026-09-02 10:29:04 From Henry Neeman to Everyone:
Although, they might be trying to avoid federal government. We'll have to find out.

2026-09-02 10:30:07 From Henry Neeman to Everyone:
Rockefeller Foundation in Little Rock, also need to talk to oil company foundations in OK

2026-09-02 10:31:23 From Christopher Fennell to Everyone:
I am unfortunately double booked with a meeting I need to attend. Henry - I will check with you later on specifics I'm missing in the second half of the meeting.

2026-09-02 10:32:13 From Mickey Slimp, GPN to Everyone:
Have to slip out too. Henry, catch me up later and see you this afternoon.

2026-09-02 10:34:43 From Cari Keller - NSU to Everyone:
Back to Philanthropic - Tulsa has the Schusterman Foundation - they are a big supporter of higher ed, not sure if they have a specific tech focused mission - but definitely STEM education. They are a board member of the Tulsa Higher Ed Consortium - which might also be a partner (sorry to ramble)

2026-09-02 10:36:29 From Emily Hendryx Lyons to Everyone:
UCO is also part of an EPIIC (Enabling Partnerships to Increase Innovation Capacity) grant that could be acknowledged on the industry workforce development side. (Not sure about getting hardware...)

2026-09-02 10:37:28 From mark.bookout@wichita.edu to Everyone:
Can we leverage our already-established university functions that solicit gifts already? This is called Foundation at Wichita, and Advancement at Mizzou. I assume every U has such a team.

2026-09-02 10:42:05 From mark.bookout@wichita.edu to Everyone:
The foundation approach becomes stronger when we focus on the workforce role. Lots of donors are wanting to make a difference for the future.

2026-09-02 10:43:01 From Michael Branicky, KU to Everyone:
From solicitation: "Consortia should demonstrate strong commitment from senior

leadership at member organizations"

2026-09-02 10:43:30 From Emily Hendryx Lyons to Everyone:
For philanthropic efforts, my impression is that UCO pretty much has to include conversations with our Foundation.

2026-09-02 10:46:21 From Michael Branicky, KU to Everyone:
Thanks, everyone. Heading out to teach now ...

2026-09-02 10:48:37 From Henry Neeman to Everyone:
$12M / 3 states = $4M per state / 5 years = $800K/state/year => $400K salary/state/year

2026-09-02 10:49:25 From AHMED Abu Halimeh to Everyone:
Thanks everyone, heading out to another meeting

2026-09-02 10:54:15 From Robert "Drew" Fleming to Everyone:
Henry, I came in late, and now I have to jump out. I should be able to join next Tuesday. Looking forward to more discussion.

2026-09-02 10:55:51 From Steve Krogull to Everyone:
I need to step out for another meeting. Thank you!

2026-09-02 10:56:05 From Tom Coffin, UALR EAC to Everyone:
This is from our recent PESOSE submission: we will design a sustainable, long-term revenue model guided by Industry Collaborator and Advisory Board member Dr. Marianna Bonanome. This strategy will model the successful academic-to-commercial translation she pioneered as a member of the WeBWorK Executive Board, where she founded Rationarium, a commercial startup that actively funnels a portion of its software revenues directly back into supporting, auditing, and maintaining the open-source developer community.

Vendor update from my side, I'm looking into the devil's bargain with Oracle would be.
I met with their team in the Oracle breakout today, and their MyLearn platform in particular looked potentially useful on the AI training/workforce-development grant crafting side. I've reached out to set up a short follow-up with them and will report back on what they might actually be able to bring to our Hub effort.
As a cloud provider, we're not likely to get hardware out of them.

**Subject:** RE: NSF proposal OAK-AI Hub

**This email originated from outside of K-State.**

Nvidia said they through in extra hardware if the hub (state, donors, whatever) ponies up money to buy hardware. In other words, nothing free, but amplified. Plus they only discount for academics.

**This Message Is From an External Sender**
This message came from outside your organization.

I've added David Molik of KSU, Brad Fleming of KanREN, and
Brian Burkhart of OneNet.

Following up to Chongle's note:

At today's NSF AI Infrastructure Hubs webinar, there was a brief intro
by NSF folks, followed by breakout rooms:

* breakout rooms for each of the states;

* breakout rooms for each of the vendors -- AMD, Dell, Intel, NVIDIA,
I think HPE, maybe one or two others;

* a breakout room for Hangar, a philanthropic foundation.

For Hangar, the contact address is regional-hubs@hangar.is.
We should definitely contact them, because they're the only ones
who seem to be offering actual funding for hardware,
instead of discounts etc.

For Dell, the contact is Dan Carroll, but I didn't get his email
(though I can probably guess it or get it from others at Dell).

For Intel, the contact is hugues.morin@intel.com.

Everyone,

In case you all attended other breakout sessions, here is a brief recap from NVIDIA

Other than the pleasantries, below is what they can offer:

- Discounts for hardware purchase in coordination with OEMs (e.g., Dell). They don't know yet how much discount can be offerred.
- Consultation for building AI infrastructure in collaboration with OEMs
- Provide support letters

Contacts:

- ronaks@nvidia.com
- misadore@nvidia.com
- Rbrumwell@nvidia.com

thanks,
Chongle

**Subject:** Re: NSF proposal OAK-AI Hub

OAK-AI Hub team,

Adding Cari Keller, Jim Ferrell, and Richard Reif from Northeastern State U.

I've come up with the best option for meetings, and

I've sent calendar invites to y'all:

Tue 4-5pm
Wed 10-11am

You *__DON'T__* have to attend every week -- and,
you *__DON'T__* have to attend both sessions the same week.

I picked these timeslots because they maximize who can attend
at least some of the time.

So please come as often as you can.

Based on who filled out the When2Meet poll, this approach
will allow all but two of you to participate some of the time,
and the two of you who can't participate at all can be represented
by others at your institutions who can come some of the time.

Adding Dan and Tai into this email thread.

Dan and Tai, please go to

https://www.when2meet.com/?38168418-eyBUB

and fill out the poll for your weekly availability.

You don't have to attend every meeting, but it'd be great
if you could attend some of them.

NSF OAK-AI Hub team,

UPDATE:

I've submitted the internal OU preproposal.

This coming week, I'll send out a calendar invite for our meetings.

(It's possible that OU will decide not to go with our proposal, but that seems low probability, because of the amazing team that we've assembled.)

At your own institution, please confirm that you can participate in this proposal, if you haven't already done so.

**Subject:** NSF proposal OAK-AI Hub

NSF OAK-AI Hub team,

Please each of you fill out the following When2Meet poll to pick a timeslot for weekly meetings:

https://www.when2meet.com/?38168418-eyBUB

If someone manages your calendar for you, please forward this to them.

You *__DON'T__* need to attend all of these meetings, though it'd be ideal if each of you either could attend a subset, and/or you can send a proxy to attend on your behalf.

By the way, I don't have email addresses for Dan Cronin or Tai Phan, so if anyone has those, please send them to me to add to this thread.
