I5k executive committee WG meeting notes

I5k executive committee WG meeting notes

8/31/2026

Attending: Monica, David, Duane, Brad, Marc, Josh
Regrets:

- Next Community meeting 9/16:
    - Chair: (Josh can't chair, but can do the October meeting)
    - Discussion topic:
    - Cameo:
    - Other updates to announce:
- How to populate agendas:
    - Keep meetings short? Better to keep the frequency - better have short than nothing.
    - Would more people attend if there were fewer meetings?
        - Quarterly, but more impactful? Make it 1.5 hours?
        - Record and post.
        - Catchier speaker, along the lines of community building.
            - Previous speakers: Mark Blaxter (EBP), Charlotte Wright (Project Psyche), Rena Schweizer (beenome),
        - Feature working group work as a topic
            - E.g. Eric could present results from the standards working group
            - Could populate 3 meetings from these
        - 1 Annual meeting
        - Split business aspect out (before or after)?
            - Could have both **junior** and 'bigwig' speak, splitting up the talks.
            - Or, 4 junior talks.
    - Start rotation in October; December, February, April, June, August (or none in the summer, more during the year). Cancel September. **Monica will put together a schedule that we can start populating.**
        - Yuki Haba - Culex genome paper in Science - reach out soon
        - Eric Tvedte - standards working group
        - GPC working group , training WG
        -
- Working group updates:
    - Training WG was cancelled since last exec committee, project development is still on-going
        - Projects may include workforce development grant opportunities, recruitment activities, and visibility efforts tied to the broader arthropod genomics workforce objectives.
    - Standards: waiting for reviews on the 2nd paper. Still in planning phase for next block of work.

    - Outreach: mainly AGS planning. Thinking about sending out a call for sessions and theme. Could think about an i5k working group session.
    - GPC: we disbanded over the summer due to scheduling, will meet again next week.
- AGS 2027 updates:
    - Josh will meet next with UC groups to settle on specific dates.
    - UC will want to know the budget - Josh will say that we have ~$15k at our disposal as an offset; we will try to break even. We will have to stay 10% or less in the black.
    - Sponsors - Oxford and Element are interested (would be good to reach out early, before setting prices).
- Website updates:
    - Recent invoice processing issues (the check was lost in the mail) for website development appear to have been resolved and invoicing activity is now continuing, hopefully payment one to Lizzie is mailed today. David to confirm whether there are any remaining payment issues.
    - Website group will touch base with Lizzie once she's able to work. Something will probably be up within a month or so.
    - Still looking for images!
- Management
    - Decision is to pay ~$50/year for Google Workspace Business Starter + Bitwarden Teams
    - David will look into setting this up and paying for it
- Budget tracking
    - Foundational Account Balance is currently $28,510.00
        - $5000 of which is committed/encumbered funds (website)
        - Forecasting:
            - Likey ~$15k for conference
            - Leaves ~$8.5k

8/10/2026

Attending: Monica, Marc, Kevin, Duane, David
Regrets: Josh, Brad

- Community meeting 8/19:
    - No cameo needed
    - Marc will be out
    - Main agenda item: Marc Blaxter will talk about EBP phase 2 for about 30 minutes
        - Monica sent him an email reminder, and he confirmed.
        - *Monica will send Marc a blurb for the agenda
        - *Ask Mark if it's okay to record
    - What other updates to announce while we (hopefully) have a bigger audience?
        - I5k standards publication announcement: https://doi.org/10.1093/genetics/iyag172

        - Advertise the GPC working group's survey
        - Advertise latest EBP newsletter: https://www.earthbiogenome.org/campaigns/view-campaign/GNWDTuSYseg8_QlgQQlWKbLNu0aLupB1LzyL_DZIOFwW6ZVwOFYoXxN-Wg6O4H-WZq7SgqhR6r_fEoLUBwLqoToTEu_wpdtP
- Keep on thinking about how to populate community meeting discussion hours
- Website updates
    - Funds are slowly moving
    - Image requests - had a few bites but not many
    - Enough material to pre-populate the website
    - You can set up a shared google account for email - paid but might be easier than handling organizational accounts across multiple platforms
- Budget
    - Now that we have an account set up through K State, it would be good to have a mechanism in place for us to keep track of the budget - we should schedule an annual review (at least - quarterly?) by the executive committee
    - Need to keep in mind expiration dates for funds (June 30 2027; should apply for an extension a few weeks prior)
- AGS 2027 updates
- Working group updates
    - Training working WG: We have diagnosed the workforce problem; the next phase is to turn i5k from an informal training community into an actual recruitment and workforce-development pipeline.
        - Several thoughts: workforce development ***materials***, grant, tabling
    - Standards: selecting next topic
    - GPC:
- EBP MC notes:
    - EBP Life issue is available: https://www.earthbiogenome.org/campaigns/view-campaign/GNWDTuSYseg8_QlgQQlWKbLNu0aLupB1LzyL_DZIOFwW6ZVwOFYoXxN-Wg6O4H-WZq7SgqhR6r_fEoLUBwLqoToTEu_wpdtP
    - GoaT is piloting 'data freeze' reports. The primary value is to generate reports for your project specific to a particular subset of your project's data. For example, if Beenome100 wanted a separate report (or URL for publications) for phase 1, they could work with GoaT to set that up. This is still in progress but a VGP example should be up soon.
    - BioInspir presentation - bioinspired molecules for one-health therapeutics and agribusiness - contributing genomes to EBP from Brazil.
    -

7/13/2026

Attending:
Regrets: Marc
Agenda:

1. Our next community meeting is 7/15 - cancel for the summer months (except August)

    a. Brad will cancel calendar
    b. Monica will send out email to mailing list (but mention Mark's talk in August)
    c. Chair: Monica
    d. Cameo:
    e. Discussion topic:
        - Monica could attempt to talk about the genome project coordination working group
    f. Marc won't be there
2. Website
    a. WG descriptions for the website: have from Genome Project Coordination, Training, Community Building
        - Still need Executive committee. Cut and paste out of bylaws?
    b. Please encourage continued artwork/graphics submissions (have a few, not many)
    c. Funds are transferred to K-State; Lizzie could start in a week or so
3. AGS2027
    a. Starting to get quotes for local costs. Baseline costs are $12k (more or less). With ~150 attendees, we would break even (assuming we make the costs low for students)
        - Doesn't assume paying for plenary speakers (yet); travel costs are high now
        - There could be a couple of local interested sponsors; David also has sponsor contacts
    b. Times: 1st several weeks of August 2027 (sports camps are done). Dorm per night is $30-60
    c. Josh has planning material from another conference in Cincinnati that he could draw from (Animal behavior society). This is a doable alternative but much more expensive.
    d. Josh won't need any volunteers until a few weeks from now to firm up costs and dates
    e. Would be good to have most items planned by September/October
    f. Bioinformatics workshop?
        - We can create a poll to gauge interest in this, once more of the dates are settled.
4. AGS2028+ - hybrid every other year, but should we start recruiting others to host in-person in alternate years?
    a. K State?
5. Other working group updates
    a. Standards: Marc hopes to have revised GBE "Genome Reports" submission ready soon although not certain if reviewers/editors will be satisfied (draft revision and response on GoogleDrive)
    b. Training: working on survey results, there are some interesting lessons to learn. Looking for asynchronous training as well as collaboration opportunities.
    c. GPC: Working on survey etc
    d. Community building and outreach: primarily via Josh's work on AGS2027

DDM report from the EBP meeting on July 2, 2026.

- I will be rotating with Monica Poelchau in representing i5K at the EBP meetings on a monthly basis.
- For those unaware, the secretariat is currently at Arizona State University and has been since 2023.
- Mark Baxter is taking over for Harris Lewin as membership committee chair. He will have a three year term.
- The phase 1 goal of 10,000 genomes will be reached in 2027.

- Phase 2 is 150,000 genomes in four years.
- There is a desire to significantly grow sequencing capacity and activity in the global South as part of this phase.
- GOAT was discussed: there's a strong desire to expand usage/adoption

6. Recruitment
    a.

6/8/2026

Attending:
Regrets: David (NSF panel, will try to attend if possible)
Agenda:

7. Our next community meeting is 6/17
    a. Chair: Monica
    b. Cameo: We can skip this if we have Harris or Mark talk; they could give a 'cameo' if needed
    c. Discussion topic:
        - Monica will ask Harris and Mark about EBP phase 2
    d. Marc won't be there, or for July
    e. We can cancel if we can't get Harris or Mark to talk
8. Website
    a. K-State Foundation Account "**i5k Arthropod Genomics Community Development Fund"** now setup
        - UCIC being billed
    b. Molk/Childers/Halfon need approval from exec committee to spend for website (documented would be best) **[VOTE]**
        - **Vote yes if the quote is in the neighborhood of 5k? All 5 attendees approve.**
    c. Molik/Childers/Halfon need executive committee approval to purchase shared (i.e. multiple login) for google account for email and coordination **[VOTE]**
    d. Molik needs executive committee approval to reach out to Robert Waterhouse about AGS slack (establish Non-profit account for slack, may have slight slight cost) **[VOTE] note: vote is not for funding, but for outreach to AGS Slack ownership for i5k maintenance**
    e. Content template for each working group to follow: i5k Training WG - New Website Copy
9. AGS task force follow up
    a. Josh will start setting up a task force soon. Sometime in June 2027?
10. Any relevant updates on the working groups?
    a. Training survey
        - Summary: The i5k Training WG survey identifies a senior/aging, **applied** arthropod genomics community with stable research roles but insufficient access to ***time-efficient computational training***. Respondents need practical, incentivized (i.e., credentials or collaboration), **modular** training in bioinformatics, AI/ML, workflow development, HPC, programming, and genome-scale data analysis, preferably delivered through virtual

workshops, self-paced modules, and ***collaborative research projects*** tied to real datasets and community infrastructure.
    - Suggested follow-on activities:
        - Explore credentialization of trainings (microcreds, moocs, carpentries)
        - Explore collaborative project spaces with training/sharing components (e.g. Scinet AGR revival)
        - Explore trainings as young scientist recruitment pipeline into i5k as well as arthropod genomics field

11. Recruitment?

5/11/2026

Attending:
Regrets: Kevin
Agenda:

12. Our next community meeting is 5/20
    a. Chair: David Molik
    b. Cameo: *Monica will ask David Luecke
    c. Discussion topic: Network/conference grant to support i5k. David M will lead the discussion.
        - GPC working group in June?
    d. Brad will be out
13. Website
    a. K State Foundation can send an invoice to UIUC
    b. Need to send out a call to the working groups for page updates etc.
14. AGS task force follow up
    a. Josh will start setting up a task force soon. Sometime in June 2027?
    b. David: Oxford Nanopore wants to sponsor i5k; Element Biosciences is probably also willing; NPP can publish the conference abstracts
15. Any relevant updates on the working groups?
    a. Training survey
    b. GPC working group may need to co-opt a discussion session in the near future
    c. Web design ad-hoc committee (currently just Marc and David)
16. Recruitment?

4/6/2026

Attending: Monica, David, Marc, Brad, Josh

Regrets: Duane, Kevin
Agenda:

- Finalize decision on web site design
  - Agree to hire Lizzie Campbell?
    - Yes
  - Determine funding outlay/duration
    - *Marc will get a formal quote
    - she would be amenable to a longer-term contract
    - Not sure that squarespace does multi-year contracts
  - Set deadlines to solicit content requirements from each WG
    - We'll have to engage in a design process with Lizzie
      - David
      - Marc
      - Chris Childers?
    - Source images from community; figure out image licensing
  - Domain name and email considerations
    - i5k.org? David bought it! For 3 years.
    - Continue looking shared email/org; talk to Lizzie about this
      - *David will look into this
      - Functions:
        - Mailing list
        - Quick way to reach the exec committee
        - Log on to i5k websites, etc. E.g. bluesky account.
      - How do we do quick communications?
    - Ask about licensing
  - Need to start conversation with Gene on transferring funds
    - *Monica will start a thread with Gene, Marc, David, Kevin, Josh to figure out how to move funds. Would this be a simple transfer to a different university? Or would it be easiest if we spent through UIUC (to avoid indirects associated with funds transfer)?
- I5k community meeting 4/15 agenda
  - Cameo?
    - *Monica will ask the GPC working group
    - Agenda should be finalized by the EOW
  - Discussion topics: i5k presentation activities. Josh and Brad will figure out how to coordinate the discussion.
    - AGS task force. Josh is willing to lead the discussion (~15 minutes).
      - FYI K-State is willing to put in a bid for 2027
      - Notes on AGS coordinator role: https://i5k.github.io/i5k-community-roles
    - AGS-X (~15 minutes). Brad lead?
      - Some burn-out
      - Need new organizers
      - Probably not happening this year

        - Any interest in EntSoc symposia in the future? Would need to coordinate this starting in December
    - Molik LOC
        - "If the proposal submitted by Dr. [insert the full name of the Principal Investigator] entitled [insert the proposal title] is selected for funding by NSF, it is my intent to collaborate and/or commit resources as detailed in the Project Description or the Facilities, Equipment and Other Resources section of the proposal."
            - Marc and Josh will sign
    - Recruitment incentives for postdocs, undergrads
        - Trophies at in-person meetings…
        - Presentation opportunities - specific postdoc or undergrad presentation sessions during upcoming i5k meetings?
        - Postdoc/Grad Fellowship support? Broader impacts for GRFP? (do they need them? -- yes!)
            - ***Advertise this…***

3/09/2026

Attending: Monica, Marc, David, Josh, Duane, Kevin
Agenda:

- 1:20-1:30: pitches for web design/development
    - 1:20-1:30 Lizzie Campbell
    - ~~1:30-1:40 Andrew Bruno~~ (withdrew from consideration)
    - Ask Lizzie for a quote for longer-term maintenance?
    - Decide within two weeks; Monica will send reminder
    - Keep thinking about what we'd want
- Should we update the community meeting calendar invite with our new membership list?
    - Action item for Brad. Marc will send Brad the new list.
- FYI Monica gave a talk on i5k to the GEvol group last week.
- We should tap one of our newest members for the next cameo presentation.
- Next i5k cc meeting on 3/18.
    - Monica won't be available on Wednesday.
    - Possible agenda items:
        - RCN Grant? - May
        - **NPP Genome Notes Journal?
    - Cameo?
        - Re-create the cameo sheet
        - Send out email to new members asking for sign-ups?
        - Especially for next week
    - Working group progress update?
        - GPC WG: We had our first meeting, have 5 members. Lots of good ideas in the first session.
        - Standards:

        - Training:
            - Second Meeting from the WG reform tomorrow, starting on landscape analysis again
            - Getting going on moving forward some previous work (videos, lists)
        - Outreach:
- I5k cc meeting April 15:
    - AGS task force
        - FYI K-State is willing to put in a bid for 2027
    - AGS-X
        - Some burn-out
        - Need new organizers
        - Probably not happening this year
    - Any interest in EntSoc symposia in the future? Would need to coordinate this starting in December

2/09/2026

Attending: Monica, Marc, David, Josh, Duane
Agenda:

- Review of Annual Meeting
    - Demographic report (Marc)
        - Good, steady attendance
    - Survey results (David)
        - Only 9 people filled it out
        - Richard Meisel was interested in Exec, Outreach, and Genome Project Coordination
        - David Luecke was also interested in Training WG
        - Jorge Alvarez Jarreta was interested in Standards WG
    - DToL open genome notes discussion
    - Thoughts about improvement?
        - Discussion went well; dominated by 5-6 people
        - Registration form for next year - perhaps have an opportunity for questions in that form.
            - Could include breakout room choice (e.g. via working groups) in the registration form
        - Discussion:
            - Could try breakout rooms next time, where they could pick from a number of topics, or without (exec committee moderator). This would give others a way to participate who may not feel comfortable speaking out.
        - Could provide more opportunities for questions in between, rather than at the end.

- Next steps (outcomes from annual meeting)

    - Genome Project Coordination WG reboot (Monica)
    - AGS task force
        - Josh will start thinking about this after March
        - Entsoc symposium
            - Start thinking about symposia/ESA - will start thinking about people to invite
            - Coordinate with jay.evans@usda.gov, michael.branstetter@usda.gov
        - AGS-X is still in the cat-herding stage. Difficulty getting organized; same people and need to get new organizers
            - More reason to rotate in person and virtual annually (also coordinate years with mosquito meeting in Crete)
    - Website tasks - Monica:
        - Post meeting summary on website (Reach out to anna.childers@usda.gov)
        - Youtube video (editing and upload; Reach out to anna.childers@usda.gov)
    - Membership: Marc will create new membership list as merge from new meeting registrants and old list. To be reviewed during the next membership review.
    -
- Requirements for web site redesign
    - Marc may have identified a free-lancer or can contact professional design firms
    - What sort of pages, functionality, CMS needs, etc.?
    - Hosting and domain-name
    - Revive the website task force?
    - Review ESA meetings and see if we can get any good ideas from their design and structure
    - Max budget? Meetings would probably need about $20k as collateral - $5k for website give or take.
    - Requirements thoughts:
        - Branding.
            - Colors:
                - Must haves:
                    - rgb 254 254 254, #ffffff, white
                    - rgb 197 112 56, #c57038, rust, copper, orangish-brown
                    - rgb 215 164 74, #d7a44a, medium-dark pastel orange
                    - rgb 26 26 26, #1a1a1a, eerie black
                - A Decent addition to this may be #40531B, olive green
            - Font:
                - “Public Sans” is more versatile so probably this one, with a little bit of space on the kerning for the Headers, this would look very sharp, geometric, and government-academic.
                - Otherwise maybe medium-bold “Work Sans”? It’s very us
            - Logo:
                - https://i5k.github.io/images/i5k.png
            - Google Slide Template
            - Google Doc Template
        - Easy maintenance by i5k members once it’s set up. Pay for one-time setup, then we modify as needed

                - Wordpress is easy to update once you have it set up. Website fee is about $300 every three years. Fairly easy to set up.
        - Pages:
            - Main inflow page
            - A few pages about specific areas (e.g. AGS)
            - A few sub-pages on each committee/working group
            - List of Working Groups,
            - consortia level publications,
            - member publications,
            - exec membership
            - Meetings page/calendar
            - Code of conduct
            - Privacy statement
            - News/temporary banners for upcoming events, e.g. annual meeting
        - Other Content
            - Contact form - help manage the membership list
            - Search
            - Account management - Easy way for multiple i5k members to log in and make changes
            - Much nicer graphics than what we have now! Visually engaging
            - Help with content structure - e.g. menu items
            - Analytics - nice to have
            - SEO - nice to have
- Next community meeting is scheduled for 2/18. The following falls on 3/18 (Monica might be absent due to spring break).
    - Brad will be out
    - Vote to cancel Feb, meet in March
    - Possible agenda items:
        - Feedback on the annual meeting?
        - Website redesign
        - AGS task force, maybe - leave this until April

- Promotional flyer for Drosophila meeting (March 5th)
    - Monica will email the ERGA promotional slide to Marc

1/26/2026

Attending:
Agenda:

- All-hands community meeting:
    - Agenda: October community meeting agenda
    - Prep meeting this wednesday - going over logistics
        - Marc will set up an analogous zoom so we have similar functionality

    - Registration numbers? 79
    - Brad will take a stab at a demographic information form
- AGS
    - What should our messaging be? Should we announce that there will not be an in-person AGS 2026?
    - Announce during all hands meeting that we have funds and are recruiting for an AGS organizing committee?
    - AGS reboot task force - who should be included in this?
        - AGS-X - Brad
        - Josh, Scott, David M
        - Any other academic i5k members - Duane?
        - Joe Lopez (Giga)?
        - Have AGS in person every other year, AGS-X virtual every other year?
        -
- Other meetings in lieu of AGS
    - AGS-X - still working on symposia
        - Possibly, insects as food
    - Fly meeting - Marc will advertise i5k there
    - EntSoc - due March 1? In Columbus. Could have a branded i5k symposium - Josh and Brad? Monica will ask Terrence/Duane. Brad may be able to recruit another USDA person to organize.
- Recruitment
    - Several new people asked to join i5k based on Marc's advertising and our plug during the ERGA meeting!
    - Can we put Europeans on our mailing list in touch with Tyler Alioto?
    - Monica will step away from the standards WG and start working on the genome project coordination working group/task force after the annual meeting
- Should we start pricing out website design contracts?
    - Should this include member pages?
    - Probably would be 2-15k, depending on LOE
    - Marc will investigate?

12/8/2025

Attending:
Agenda:

- All-hands community meeting:
    - Need to reach out to Rena about possible dates. Monica will do this this week. I'll also schedule a prep meeting.
        - First, I'll reach out to the exec committee
    - Eric can do either Jan 21 or Feb 18, but would prefer the later date. We should also consider Jan 28th, Feb 4th and Feb 11th since Feb 18th is the beginning of Ramadan, and during Chinese NY (and people may be out for president's day)

    - Check in again with Sue about award? David will pick up on this.
- AGS 2026 status.
    - I'm wondering if we should put our next efforts into forming an AGS working group, starting with recruiting a coordinator. https://i5k.github.io/i5k-community-roles
        - This should be our top agenda item!!!
        - David: need to have a well-defined strategic focus for the meeting
        - Who should we volunteer to be chair? Josh, David, Scott, …?
            - Other participants - Megan Fritz? Amanda Stahlke?
        - Lightning talks? To help justify attendance…
        - Specifically try to attract grad students and postdocs to get new people into i5k
    - We might lose out on USDA people given that they may not have included AGS in their travel plans
    - Should we try to have an i5k symposium or satellite meeting at EntSoc? 2 symposia back to back? March 1st is deadline for symposia and workshops
    - K-State Olathe conference services can handle ~130 participants, David currently organizing the AgBioData annual meeting there
- AGS-X - April/May start date?
    - 'Make up meeting' for Entsoc (people couldn't attend due to furlough)? Recruit via ARS-AGR mailing list? Also for people who couldn't attend PAG
    - Might help to keep interest in AGS alive
- Fly meeting is in March - non-drosophilid Diptera symposium, Marc will be speaking there and will advertise i5k
- Recruitment in general. https://i5k.github.io/i5k-community-roles

General annual meeting notes:

- Slides should be due to Monica two days before meeting, as backup (create google folder for this)
    - Make sure they are available and organized
    - Ask if they can be provided on the website as well
    - Ask if recording is okay. Keynote and working group talks; discussion, no. That said, we can provide a summary of the discussion on the website.
- Awards - we need to honor Sue's contributions to i5k during this or an upcoming meeting.
- Advertising: Need to coordinate this, provide announcements at the same time.
    - Slack - **Marc**
    - Arthropodnews - we can ask Rob. **Brad** can do it.
    - Ask EBP to share; create a social media version of the announcement with link to webpage - **Monica**
        - **Marc** will also post on his bluesky account for Redfly
    - Regular i5k mailing list - **Marc**
    - **Brad** can advertise with AGR
    - **Monica** can advertise with i5k Workspace mailing list.
    - **Monica** will set up webpage early this week.
- Roles and responsibilities for the meeting:
    - We can all be co-hosts

    - Chat monitoring - **David**
        - Including Rena's talk questions
    - Mute people who aren't muted - **everyone** have an eye on this
    - Remove people if needed - **Brad**
    - Remind Marc to hit record and use the AI agent! - **Duane**

10/6/2025

Attending:
Agenda:

- Check-in with Josh about AGS2026 funding
- Check in with David about KSU alternative

9/8/2025

Attending:
Agenda:

- Quick check-in with Josh about AGS2026 funding
    - We can provide the initial money to UC and have a buy-back with registration fees
    - 10-12 k grand total need to be at UC
    - Whatever is recouped from registration fees would offset those initial costs
    - Looking into a facility with 300 people max; if there are fewer participants they can re-arrange to make things feel less empty
    - (Nicer) Dorm rooms are available (singles), $40/night
    - Office of research would offer $2k donation, and 2k 'down' to be repaid
    - We can wait until October until making a decision
- **Should we form an AGS working group already?
    - Given USDA uncertainty, having AGS in 2027 may not be bad
- Welcome, David!
- **September 17** i5k cc meeting - any pertinent agenda items? Otherwise, cancel
    - Use this as a prep meeting for those presenting and organizing, instead? Yes.
    - Invite Eric and Teresa so they are aware of the setup.
    - Slides should be due to Monica two days before meeting (10/13), as backup (create google folder for this)
        - Make sure they are available and organized
        - Ask if they can be provided on the website as well
        - Ask if recording is okay. Keynote and working group talks; discussion, no. That said, we can provide a summary of the discussion on the website.
    - ***Brad** needs to cancel the regular calendar invite
    - ***Monica** will send out the invitation for us, Teresa and Eric.
- **October 15** all-hands community meeting:

    - Check in on agenda status. October community meeting agenda
    - Awards - we need to honor Sue's contributions to i5k during this or an upcoming meeting.
    - Advertising: Need to coordinate this, provide announcements at the same time.
        - Slack - **Marc**
        - Arthropodnews - we can ask Rob. **Brad** can do it.
        - Ask EBP to share; create a social media version of the announcement with link to webpage - **Monica**
            - **Marc** will also post on his bluesky account for Redfly
        - Regular i5k mailing list - **Marc**
        - **Brad** can advertise with AGR
        - **Monica** can advertise with i5k Workspace mailing list.
        - Should have this out by Sept 15th.
        - **Monica** will set up webpage early this week.
- ***Monica** will move October 13 meeting to October 6 - if need be we can cancel.
- Roles and responsibilities for the Oct 15 meeting:
    - We can all be co-hosts
    - Chat monitoring - **David**
        - Including Rena's talk questions
    - Mute people who aren't muted - **everyone** have an eye on this
    - Remove people if needed - **Brad**
    - Remind Marc to hit record and use the AI agent! - **Duane**

- If there's time
    - Updates on membership list
        - Has received ~30 responses. Sent follow-up to those who did not respond; will send another email next week.
        - Should follow up with those who attend the meeting if they want to join
    - discuss next moves for recruitment

8/20/2025

Attending:
Agenda:

- Welcome/Intro/Background - Monica (5 minutes)
- Invited presentation: 30 minute talk on Beenome100 Project
- Exec committee - Monica (5 minutes)
    - Add call for roles to these slides. https://i5k.github.io/i5k-community-roles. Include QR code for people to scan during the presentation.
- Outreach and Community building - Brad (5 minutes)
- Training - Teresa (<5 minutes)
- Genome Project Coordination - Monica (<5 minutes)
- Standards WG - Eric (5-10 minutes)
- Awards thought: Honor Sue in some way? I reached out to her about this and haven't heard back.

- Discussion - who wants to lead this? Brad (30 minutes)
    - Structure - let's just wing it.
    - Possible topics:
    - Differential between i5k mission, vision, initial goals and what we're accomplishing? E.g. part of our mission is "Present **recommendations to fundholders** for the support needed to provide new opportunities for arthropod genomics in addressing fundamental research questions."
        - No progress or plan
        - AI hook? How are we doing wrt AI?
        - https://www.biotech.senate.gov/final-report/chapters/
        - Can we provide a better infrastructure so that those inclined to respond to RFIs are better positioned to do so?

Other action items:

- Should record the presentations, consider posting to youtube channel
- *Monica: Need an announcement with rough agenda. Should include the zoom registration link. The github page will be the link that we share.
- *Marc: Zoom link - Marc will check what his account can do. Can hold up to 300 participants. Otherwise, Monica's account.
    - Should we require registration? That would allow us to gauge how to manage the discussion. Also screen out zoom bombers.
    - *Marc and Monica will look into the registration option
- *Monica - will create web page to link back to with registration link, so that we don't have the zoom link broadcasted everywhere.
- Exec committee/speakers can be invited to join 15 minutes early for setup
- Send announcement to:
    - Our regular email list
    - Arthropod news
    - AG slack
    - AGR list; AGS-X attendees
    - Redfly blue sky account
        - Ping EBP to repost this
        - ERGA
- *Brad: Update calendar invite to 1.5 hours? Add .5 hours to the front end - Brad will do this. Will update once we have the announcement ready.
- Future exec meetings:
    - Need to set up rotation for WG chairs etc
    - What to do about September i5k meeting?

8/11/2025

- Results of vote on i5k charter/bylaws
    - Consider them adopted! 12 votes in favor.
    - Mark's comments on membership: mainly semantic
    - Might want to update the working group descriptions per Mark's comments. Marc can fix the wording
    - Adding i5k members to EBP committees - Monica and Anna are already on several EBP committees, but we could consider better advertising within i5k of new openings
    - Marc will let Monica know when he's done modifying the document, and she will put it up on the website
- Implementing the bylaws
    - Annual review of membership list
        - Ask for 'remove me' responses or 'keep me'?
    - Need a membership form as well. Can do google form. Monica can set up the form and add Marc as provisional MC until we have recruited a new one.
- Finish agenda for annual meeting
    - Could be 9/17 or 10/15. Might be better to do October at this rate
        - Switch time to better accommodate teaching responsibilities?
        - Could record meeting for those who can't attend
        - Zoom AI summaries aren't bad - Marc has this. Monica will check her zoom account settings to see if she can activate this. Tends to require just a bit of post-hoc editing.
        - Could try on the half hour. Probably shouldn't go too late to accommodate european members
    - Promotion:
        - Usual i5k mailing list
        - Slack
        - Arthropodnews mailing list
        - EBP social media accounts - ask them to repost
        - AGR/ARS mailing list
    - Agenda:
        - Annual report by exec committee about the past year. Monica can take a stab at this. She'll populate based on notes from past meetings. (15 minutes tops? Depends on working groups)
            - Restructuring, bylaws, working groups
            - Working group products
                - Ask each working group lead to present a slide or 2 - could include advertising recruitment for open positions for these groups
            - Updates from 'member groups' Ag100Pest and Beenome100. DToL as well? ERGA?
        - Presentation on a highlight of the year. 10 minutes plus questions?

        - *Beenome? Monica will reach out to Rena/Michael/Jay
        - DToL insect update? Update from Mark (DToL progress) or Mara (on insect sampling paper)?
        - Project Psyche
    - Awards? Not this year - Wait until we have an awards coordinator
        - In lieu of award - an acknowledgement of everyone who has contributed in the past year.
            - Encourage working group leads to publicly acknowledge WG members for their roles and thank them (e.g. AGS speakers and organizers)
            - Brad can mock up certificates for AGS-X and share with the group. Letters for promotion packages that outline the contributions? Insect-themed awards?
            - Kevin - can we get a USDA award for this group?
            -
    - Open discussion
        - General feedback from the attendees on what i5k does well, what can be approved upon?
        - Specific goals for the next year
            - In exec committee presentation, could start with where the vision started; then fill in where we're at. Could discuss where the gaps are. Speaking of - need a role for funding coordinator?
    - Marc will send out an email that
        - August meeting is cancelled; exec committee will meet to plan for the Oct meeting
        - Bylaws have passed
        - Save the date for annual meeting
    - Brad will cancel invite
    - Monica will set up exec committee meeting
    -
- Brainstorm recruits for i5k roles and reach out to them
- Training WG new Chair (David Molik has self-nominated)
    - Monica will reach out to David to check on Sue; will otherwise email David and Theresa about starting WG and adding David to Exec committee invite
- I5k funds from BASF: Monica reached out to Josh. Josh sent request and has a meeting scheduled for Aug. 20th (event group was unavailable form Aug. 1-14).

- Comments from Mark Blaxter on i5k charter:
- Membership: it would be good to have a "project affiliation" associate membership, so that, for example Darwin Tree of Life or Psyche projects could express their support for and engagement with i5k goals. I agree that membership is personal to humans, but think a "collective" association for big projects would bring many benefits.
-
- GoaT is a project of the Tree of Life programme at the Wellcome Sanger Institute (not simply of the Darwin Tree of Life project)
- GoaT uses a TAXONOMIC tree (important distinction)
- GoaT is the adopted datasystem for coordination across EBP projects

-
- Standards: it would be good if i5k actively participated in the EBP Standards committee, so for example including in the Standards cttee remit “representation to/on the EBP standards committee”, for example by nominating a member to serve on the EBP committee.

7/28/2025

- Discuss new funds
    - “Our business office has unearthed $30K earmarked by BASF Corporation for i5K, called the i5K Support Fund. Any suggestions on who it should go to?”
    - Purpose statement focuses on support for i5K infrastructure. Gene was designated by BASF to be responsible for determining use.
    - No rush
    - Sue and Kevin got the funds from BASF, and parked it at Illinois with Gene. General money just to support the development of i5k. This is probably the 2nd year of money that we got from BASF.
    - Ideas what we should put the $30k towards?
        - First choice: AGS support
            - Good idea, but is this enough? We’d need to have a better understanding of the costs involved.
            - *Monica will email Josh
        - Website development
            - Also a good idea, but more questions about the cost. Quick google search suggests this shouldn’t be too expensive. Could we do 2 things with these funds?
        - Good opportunity to competitively support community projects
            - Perhaps sequencing at the Keck center?
        - Does BASF care how this is used? It might be good for them to know/tout the research or projects that are eventually funded by this
- Bylaws:
    - Nobody has made comments on the bylaws.
    - Next step: put it out for a vote. Marc will supply the text for the voting form; Monica will set up the google form

7/7/2025

Attending: Monica, Brad, Marc, Kevin
Regrets: Duane

Agenda:
- Next i5k cc meeting: July 16

- Will be chaired by: Monica
- Cameo: None (none for the rest of the year, either)
- Add ‘save the date’ for the annual meeting in September
- Discussion topic:
    - Bylaws approval - Marc
    - Recruitment document should be up on website - ask for feedback on page and recruitment strategy - Monica
    - EBP membership council highlights - Monica

Other topics:

- Bylaws
    - Marc has incorporated comments
    - Need to follow procedures for adopting it
        - *Marc will make fresh google doc - allow anyone to comment but not edit
        - Introduce during i5k cc meeting next week
        - Have open for a week
        - Then, have open for vote
            - *Monica will make a google form - will probably not make anonymous to ensure that members are voting, and ensure that people only vote once
    - Once approved, post on website (Monica or Chris)
- *recruitment
    - Monica needs to finalize 2 roles (one with feedback from David Molik)
    - Then, need to post on website
    - Dissemination:
        - Create slide for advertising
        - Come up with Slack post
        - *Identify specific individuals to recruit, and individuals with junior lab members
- Annual meeting per new bylaws in September - plan agenda and advertising? September meeting is 9/17
    - Annual report by exec committee about the past year
        - Restructuring, bylaws, working groups
        - Working group products
            - Ask each working group lead to present a slide or 2 - could include advertising recruitment for open positions for these groups
        - Updates from ‘member groups’ Ag100Pest and Beenome100. DToL as well? ERGA?
    - Presentation on a highlight of the year
        - Beenome?
        - DToL insect update? Update from Mark (DToL progress) or Mara (on insect sampling paper)?
    - Awards? Not this year - Wait until we have an awards coordinator
        - In lieu of award - an acknowledgement of everyone who has contributed in the past year.
    - Open discussion
- I5k presentation to EBP on 7/3: https://docs.google.com/presentation/d/1VjiI2z7R-2emQrAPS8MKXEymR2C1kqW4/edit?usp=drive_link&ouid=110456639111548183343&rtpof=true&sd=true

- AGS?
    - No virtual option this year either.
- Working group progress:
    - I5k standards - very close to submitting 2 papers. EBP is collecting metrics on ‘EBP papers’. Monica shared details of the 2 papers with Nicolette.
    - Outreach:
        - youtube videos for AGS-X are posted
        - Summer lull, otherwise

6/9/2025

Attending: Monica,
Regrets:

Agenda:
- Next i5k cc meeting: July 16
- Will be chaired by: Monica
- Cameo: None (none for the rest of the year, either)
- Discussion topic:

Other topics:
- Finalize bylaws
- Move recruitment forward
    - Create slide for advertising
    - Come up with Slack post
    - *Identify specific individuals to recruit, and individuals with junior lab members
    - Monica will finish up google doc - will have the aspirational goal of having it up on the website by next meeting
- Plan annual meeting per new bylaws?
    - September would be a good time
- Working group progress updates
- AGS?
- Duane will be out july 7, 14, 16
- Reschedule next exec committee meeting for July 7

5/12/2025

Attending: Monica, Marc, Brad
Regrets:

Agenda:
- Next i5k cc meeting: 5/21
- Will be chaired by: Duane?
- Cameo: None (none for the rest of the year, either)

- Discussion topic:
    - Bylaws
    - Feedback on cameos
        - Marc still thinks it's a good idea - perhaps resume after the summer?
    - Feedback on recruitment doc

Other notes:
- Roles + responsibilities continuation;
    - Targeted recruitment. Brad can ask Glenn if it's possible to add on new videos post-hoc to AGS-X recordings. That could be one way to advertise
        - We could create a new video explaining the roles.
        - Post page on AGS Slack
        - Create social media post and ask EBP to post
        - Send out to AGS and i5k Workspace lists
    -
- bylaws
- Discuss how effective we are in reaching the full taxonomic scope of Arthropoda?

4/14/2025

Attending: Regrets: Marc

Agenda:
- Next i5k cc meeting: 4/16
- Will be chaired by: Marc?
- Cameo: Josh Benoit
- Discussion topic:
    - i5k Governance Charter (Working Draft)
    - Should we re-name the coordinating committee meeting meetings to 'community meetings'?

Monica needs to report on EBP asks.

3/10/2025

Attending: Monica, Kevin, Marc, Brad
Regrets:

Agenda:
- Next i5k cc meeting:
    - Date: 3/26
    - Will be chaired by: Sue? Otherwise, Brad.
    - Cameo: Rena Schweizer
    - Discussion topic:

        - Follow up on i5k tasks and personnel? Ask that spreadsheet is filled out to the extent possible.
            - Outreach
            - Training: Monica will reach out to David Molik and Teresa Shippy
            - **Discuss recruitment process**
                - what are the next steps?
                - Who might be able to recruit?
- Discussion:
    - ERGA application
        - See suggested text here: Suggested text for ERGA application questions:

    - Consideration of a more formalized membership and governance structure
        - Here's some ideas stolen from a different charter I had lying around: i5k Governance Charter (Working Draft)
        - HOMEWORK - everyone review the governance charter and provide comments.
            - Have this on April's agenda for the cc meeting.
        - Should we re-name the coordinating committee meeting meetings to 'community meetings'?

    - EBP requests:
        - Addresses of members. Should I reach out to our member list again to fill out the addresses/affirm their i5k membership?
          i5k coordinating committee members for EBP application
            - Data call for updated membership in the coordinating committee?
              2025 i5k coordinating committee members for EBP application
        - 3-5 'elevator pitch' slides for Harris to use in his talks. i5k-for-EBP-request.pptx
            - Add fringy's images
            - Have a slide that highlights specific genome projects of interest - spotted lanternfly; AGH; locusts; ALB - wood digestion enzymes were identified. Include images.
            - Could add publications to metrics/accomplishments
        - 3-5 minute video of a project rep explaining the project, to be shared on the EBP website and on social media - not done
        - New publications (will send pubs provided by David Molik)
            - What is an i5k publication?
                - Any publications that are associated with the i5k bioproject umbrella
                - Anything resulting from the i5k working groups
                - I5k Workspace publications
                - Any self-identified publications are also welcome - and we can encourage them to add their data under the i5k bioproject umbrella?
        - **Monica** will ask Maja about training materials; other products. Would they like to know about these?
    - Need to continue updating i5k tasks and personnel sheet. i5k tasks and personnel

2/10/2025

Attending:
Regrets:

Agenda:

- Next i5k cc meeting:
  - Date: 2/19
  - Will be chaired by: Monica
  - Cameo: Joshua Tompkin
  - Possible discussion topics:
    - Follow up on tasks and roles for new recruits.
    - Monica will evaluate whether Maja's requests are appropriate for discussion.
- Working group updates:
  - Community building + outreach
    - No word from Scott. Brad will call him today.
  - Genome project coordination: Needs recruits.
  - Standards: Same old.
  - Training:
    - Sue, should we abandon this working group?
    - Would be nice if they could work on defining needs, tasks, roles and recruits, whether or not it is finished
- Discussion:
  - Tasks and roles for new recruits
    - Done- Monica needs to send task list to Theresa and Sue for the training working group
    - Done - Monica will re-distribute that to all working group leads
    - **Reach out to Maja Peirce and Anna B. (?) from EBP on how best to approach a communications strategy for GoaT submission for i5k. Also Cibele.
  - Role definitions for existing i5k cc members?
  - Email about joining ERGA
    - Done: Still need to have access to the attachment - I will email the original sender, ask for the attachment, mention that Marc is the contact, cc Marc and Sue
    - Who wants to be the university member who signs the agreement? Marc.
  - **Other requests from Maja/EBP

Affiliated Initiatives (Section 2.3 of the Governance Document)

- The same procedure applies to Established BioGenome Projects, Emerging BioGenome Projects, and BioGenome Hub Institutions wishing to be recognised as Affiliated Initiatives.
- The Executive Board considers suggestions from any ERGA Member(s) for potential new Affiliated Initiatives, as well as considering requests directly from the potential new Affiliated Initiative, in the form of a simple expression of interest email sent to the Executive Board.
- The Executive Board decides, in consultation with the ERGA Council, whether or not to invite the potential Affiliated Initiative to submit an application.
- The application to be sent to the Executive Board as a single PDF document must contain the following information (brief descriptions) about the initiative/organisation:
    - The goals and scope (taxonomic/geographic etc.), and history/timeline from inception to current status.
    - The leadership, membership, and governance, including a statement indicating the project or institution's commitment to justice, equity, diversity, and inclusion principles and what actions will be taken to uphold this commitment, as well as adhering to the ERGA Code of Conduct.
- The application is reviewed by the Executive Board, further information or clarification may be requested if deemed necessary.
- Once deemed sufficient by the Executive Board, the application is sent to the Council with a recommendation to accept a new Affiliated Initiative, which is then decided through Official Voting of the ERGA Council.

-

1/6/2025

Might need to change the meeting time, I will be returning from PAG that day. Jan 6?
Attending: Kevin, Marc, Monica
Regrets: Duane

Agenda:

- Next i5k cc meeting:
    - Date: 1/15
    - Will be chaired by: Duane? Monica as an alternate
    - Cameo: Nobody. Monica will nag somebody
    - Possible discussion topics:
        - Demo the task sheet: https://docs.google.com/spreadsheets/d/1bW0D_f6P4qxDfJIV2vfw0VISORo-vC5VgfhCj0lty4A/edit?gid=0#gid=0
        - Tour of the 'new' website - what needs to change, and who can do the changes? Monica will write up a blurb to advertise this and will add it to the provisional agenda
        - Is it worth continuing the recruitment discussion?
        - What are meaningful ways to recognize participation?
            - Certificates
            - Name listed on website for tasks/products

            - Credit for actual products (e.g. talks, papers). Should we promote the generation of these types of products more? Products can now also be defined on CVs (things other than just papers, e.g. tutorials, software, etc)
            - Point out that this is an international effort to promote insect genomics. Founding member of the Earth BioGenome Project. (We should also have that on the website).
            - We should have a 'benefits of joining i5k' page, similar to EBP. https://www.earthbiogenome.org/benefits-of-joining-the-ebp
        - Should we formalize our membership/process for joining? This would be a good discussion for the website as well.
- Working group updates:
    - Community building + outreach
    - Genome project coordination:
    - Standards:
    - Training: Sue, should we abandon this working group?
- Discuss:
    - Outcome of 12/18 discussion on recruitment:
        - Set up lists or 'use cases' of things that we need help with and the type of person who could do it
        - Start list of easy ways we could incentivize participation
        - Lots of work for the outreach and coordination group - how to lighten their load?

12/9/2024

Attending: Monica, Duane, Marc
Regrets: Kevin, Brad, Sue

Agenda:
- Next i5k cc meeting:
    - Date: 12/18
    - Will be chaired by: Marc
    - Cameo: David Molik
    - Possible discussion topics:
        - BDG session recap - 20 minutes
            - Related, AGS 2025 meeting update - in the bioinformatics workshop before the meeting, expand scope to focus on what 3rd - 5th year grad students need and how to 'lure' them into i5k with a list of ways to contribute at the ready
- Working group updates:
    - Community building + outreach
        - June 18 - 20 overlaps with the developmental bio meeting
    - Genome project coordination:
    - Standards: plugging away at paper, slowly but surely
    - Training:

11/4/2024

Attending: Monica, Kevin, Marc, Brad
Regrets: Duane, Sue

Agenda:

- Next i5k cc meeting:
    - Date: 11/20
    - Will be chaired by: Brad?
    - Cameo: Reach out to people for December or January - we have enough to discuss.
    - Possible discussion topics:
        - EBP meeting recap - 20 minutes
            - Include i5k standards at EBP IT meeting with high viewership
            - Include EBP recap on new genome notes model?
        - BDG session recap - 20 minutes
            - Related, AGS 2025 meeting update - in the bioinformatics workshop before the meeting, expand scope to focus on what 3rd - 5th year grad students need and how to 'lure' them into i5k with a list of ways to contribute at the ready
- Working group updates:
    - Community building + outreach
        - AGS2025
            - In Knoxville, TN
            - Maybe hybrid
            - Dates tbd but should be in June 2025
            - Will have pre-symposium workshop as mentioned above
        - Decent attendance at BG2024
        - PAG
        - AGSx
    - Genome project coordination: I sent out an email asking for feedback on guidelines, got only one response.
    - Standards: plugging away at paper, slowly but surely
    - Training - maybe Monica can talk to Anna about how to upload the youtube videos.
- I5k BG2024 session recap
- EBP meeting recap
- External funding through NIFA Multistate Research Projects National Information Management and Support System (NIMMS)? https://nimss.org/
  Example: NRSP8: Genomic Capacity: Building Applied Genomic Capacity for Animal Industries https://nimss.org/projects/view/mrp/outline/18969
  Example: NRSP4: Facilitating Registration of Pest Management Technology for Specialty Crops and Specialty Uses https://nimss.org/projects/view/mrp/outline/18675
    - Would need a collective group of university colleagues to promote this. Comes from hatch funds. Would probably need people at land grants.
    - Invite Fiona and Erika for a discussion? Probably in Jan/Feb

9/9/2024

Attending: Monica,
Regrets: Duane

Agenda:

- Next i5k cc meeting:
    - Date: 9/18
    - Will be chaired by: Sue? If she can't do it, Brad can. Monica will email her to ask.
    - Cameo: none yet. **Rena? David Molik? ***Jay? Josh, Scott E, Fringy?
    - Duane has a teaching conflict throughout the semester for cc meetings. Can have a postdoc rotate in.
    - Discussion topic:
        - I5k website? Yes, we should ask for comments.
            - Can advertise this in the meeting announcement to give people some time to review in advance
            - Brad or Monica can walk the group through the restructuring as well during the meeting
        - AGS2025? Scott can't come next week though
        - Anything to recap from ICE? International outreach efforts, ctd.
        - Advertise opportunities at Biodiversity genomics (Last week of October) - session is coming up! Jay has a beenome/badnome session; duane's collaborator is doing a beetle session
            - Understanding what each working group of i5k wants to get out of this
                - ***We want to advertise what the working groups are doing** Would be great if they could provide slides.
                - Do the working groups want feedback?
                - Do they want recruitment?
                - Do we want a google form for signup for the i5k portion? Yes, with a QR code on a slide to make it as simple as possible for people to sign up.
            - Ask Jay if he wants some airtime at the cc meeting
        - Scheduling conflicts with new semester?
- Working group updates for exec committee, if any:
    - Monica can talk about genome coordination
    - Standards - slowly but surely chipping away on white paper
    - Outreach - a number of things on tap
        - ICE wrap-up
        - Biodiversity genomics
        - PAG
        - AGS-X
        - Website
        - AGS2025

8/12/2024

Attending: Monica, Duane, Marc, Brad, Sue
Regrets: Kevin

Agenda:

- Next i5k cc meeting:
    - Date: 8/21
    - Will be chaired by:
        - Brad will be out traveling; Sue starts teaching; Duane has a teaching conflict, Marc will have to leave 5 minutes early but could handle chairing.
    - Cameo: none yet, possibly slim representation anyway so ask during meeting for new volunteers
    - Duane has a teaching conflict throughout the semester for cc meetings. Can have a postdoc rotate in.
    - Discussion topic:
        - I5k website?
        - Scheduling conflicts with new semester?
    - Decision: cancel August cc meeting, defer to September. Brad will cancel.
- Other items to discuss:
    - Working group updates as needed
        - outreach : ICE, website, AGS2025, EBP meeting, AGS-X, PAG workshops…
        - Training: took the summer off. Still stuck on getting things posted.
        - Standards: still working on white paper
        - Coordination: Monica will use the hour of the i5k cc meeting to work on goat templates and recruit others to test
    - AGS2025
    - Should we advertise the cc meetings on the AGS Slack?
        - Sure!
        - Marc will also post on Slack coming up next channel
    - Should we schedule a review on how the working groups/progress towards our vision is going?
        - Recruitment? outreach/training and genome project coordination.
        - Our mission or vision includes reaching out to funders - e.g. VectorBase underscores the importance of this.
            - We might want to include a statement in i5k standards white paper with funders as the audience
    - I will need to provide accomplishments and vision/plan for i5k in general as part of a larger set of reports to ARS leadership

7/8/2024

Attending: Monica, Marc, Duane, Brad

Agenda:

- Next i5k cc meeting: 7/17
- Will be chaired by Monica
- Cameo: Monica followed up with Sarthok again on ⅞
- Monica will send Marc a brief blurb on the AGS highlights that she'll discuss early this week.
- Discussion topics:
    - AGS recap from Monica. This will probably fill out the entire session.
    - Monica has not heard back from Charlotte Wright; will reach out again
        - Duane will attend the project meeting on psyche. His sense is that they are very action oriented (data generation phase).
        - What would they gain from being involved with i5k?
        - Meeting would likely be in the i5k cc meeting schedule.
- GoaT: Monica has not had time to follow up with Cibele on this - she (or someone) will need to find time, as this is important.
- Website updates
    - Brad, Anna, Chris, Monica worked on website updates prior to AGS2024
    - Need to ask working group leads about mission/vision/goal statements for website
- ICE is in August 25 - 30.
- Biodiversity Genomics - Duane won't be there at the time but the beetle session will still take place. Rich Adams (Arkansas) will take over.
    - Rich may want to join some of the outreach WG meetings to coordinate.
    - I5k session - it would be good to be very explicit about what we're recruiting. E.g. website development; specific training goals;

6/10/2024

Attending: Monica, Brad, Marc, Duane, Sue

Agenda:

- Next i5k cc meeting:
    - We need to reschedule it. Cancel it! Next meeting would be July 17th.
        - Brad will cancel; no agenda needed for this month from Marc.
    - will be chaired by: Marc, Duane, Sue will be out - someone else will need to chair (either Kevin or Monica)
    - Cameo: Monica will follow up with Sarthok
    - Other discussion topics:
        - AGS recap - specifically, Monica will talk about the i5k discussion session, and follow up/action items

        - Charlotte Wright on project psyche - do this at a later time
        - Website revamp - demo existing changes, discuss possible future ones
- Discuss next steps for genome coordination with GoaT
    - Original group was Duane, Kristen, Anna, Rob. No suggestions on who else to recruit.
    - Monica will look at her schedule and see if she can work on this with Cibele or others.
        - In terms of testing the spreadsheet - Duane's postdoc; David Molik; perhaps other
- Quick update on website change discussion
    - Mission + vision, include new graphic on front page
    - Go into some sub pages and integrate links (e.g. to AGS-X; youtube links)
- Marc's legal counsel says that Marc can be the voter for EBP!
- Monica needs to reach out to Project psyche
-

5/13/2024

Attending: Brad Coates, Kevin Hackett, Marc Halfon, Monica Poelchau

Agenda:

- Next i5k cc meeting:
    - will be chaired by: Brad Coates
    - Cameo: Marc Halfon
    - Other discussion topics:
        - Meeting with Cibele
        - Duane or Monica could explain how the genome project coordination committee was formed
        - How is i5k doing in terms of GoaT submissions?
        - How can we streamline submission, given the open nature of i5k?
        - Monica had some specific examples about the i5k pilot data that may need curation/question about how to submit changes
- Next cameos:
    - Monica will reach out to Sarthok
    - Sue after that? Many other regulars that we could tap before re-assessing
- Reach out to project psyche
    - Invite to future cc meeting; be sure to advertise to Beenome and ag100pest people as well
- A discussion idea:
    - Follow up with Joe Lopez
    - recruitment/advertising?
        - Advertising discussion items prior to meeting is definitely helpful to attract the right people
        - What should be kept internal, vs. broadcasted? How would the broadcasting happen?
        - twitter/x etc: what is our 'policy' here?
    - Website:
        - Will discuss in outreach group and create a subgroup before AGS

- Needs some revamping of the front page:
    - Need to advertise AGS-X there; update menu items
    - Might need to recruit new people the outreach committee to help update the website
    - **Getting new mission and vision statements up on the website**
        - Should do this before AGS in Kenya/ICE in August/Biodiversity Genomics in October
    - Have page on website about recruitment? 'Join our working groups'?
    -

4/15/2024

Attending: Monica, Marc, Sue, Kevin, Duane

Agenda:

- Next i5k cc meeting:
    - will be chaired by: Sue
    - Cameo: Sarthok Rahman
    - Other discussion topics:
    - A discussion idea:
        - to increase engagement with i5k, create a committee that highlights 'top papers'? https://maizegdb.org/hot_new_papers
        - Sue's podcast idea about interviewing authors of new genomes
            - New students or postdocs for this - come up with a script to make it easier. Same set of questions to ask.
        - Short scientific talks a la EBP
- EBP voting delegation
    - Marc will check if he can do this. We won't be able to vote on April 16th's vote though.
- General working group progress
    - Outreach - Brad absent (apologies)

AGSX https://i5k.github.io/agsx2024;

Session 2: Insect Genome Biology and Evolution was held on Wednesday, April 10 at 11am-1pm EDT. Moderated by Lindsey Perkin.

Recap & updates on posting recording to YouTube

Upcoming sessions:

Session 3: Beenome100 and Comparative Bee Genomics, Tuesday, April 30 at 11am-1pm EDT. Moderators Jay Evans & Michael Branstetter.

Session 4: NCBI Comparative Genomic Resources, Tuesday, May 21 11am-1pm EDT. Moderated by Terence Spencer.

Arthropod Genomics Symposium, June 25-27 at KCB Leadership Centre, Nairobi, Kenya Nairobi, Kenya. Host: Kenyan Medical Research Institute (KEMRI). Detail at https://bit.ly/ags2024. i5K representation: Anne Muguai from the Africa BioGenome Project, Michael Branstetter from Beenome

BioDiversity Genomics Symposium 2024 (BG24) 28th Oct - 1st Nov 2024

SYMPOSIUM on the Beenome100 and Ag100Pest Initiatives, Jay Evans and Anna Childers
i5K COMMUNITY would like to hold a meeting, Brad S. Coates and Monica Poelchau
BEETLE TREE OF LIFE Duane McKenna

International Congress in Entomology 2024 (ICE24)

Symposium "International sequencing initiatives: Building genomic resources and bridging research disciplines", organized by Brad Coates

- Training - haven't been meeting. Need to meet with Anna to figure out how to post on youtube.
- Standards - continuing to work on gaps and standards outline as basis for an eventual publication

- Meeting with Cibele in May
  - She'd like to have a reminder for next month
  - Would be good to have questions to facilitate the conversation - we could develop those in our next exec committee meeting

3/11/2024

Attending: Monica, Kevin, Marc

Agenda:

- Next i5k cc meeting:
  - Brad: Calendar invite - Monica will ping Brad
  - will be chaired by: Monica
  - Cameo: Chris
  - Other discussion topics: provisionally, discussion i5k AGS 'lunch' questions - Monica will think about this and add to agenda
- What do we need to follow up on regarding the genome project coordination working group?
  - Who was going to reach out to GoaT? Follow up with Duane about this.
  - Invite Cibele to give a briefing to … some i5k entity (could be the i5k cc)
- General working group progress
  - I5k standards: making progress, will meet later today with new members.
- Monica has not had a chance yet to investigate NIMSS more. Kevin is not aware of it.
- I5k talks at AGS 2024: Anne Muguai (Africa BP) and Beenome100

-

2/12/2024

Attending:

Agenda:

- Next i5k cc meeting:
  - will be chaired by: Duane
  - Cameo for this week's cc meeting: Chris - Monica will remind Chris
  - Duane's presentation? Other discussion topics?
    - Duane is not sure if others can attend the i5k cc meeting on Feb 21st.
    - The committee did not start any significant work, but did put together a spreadsheet.
    - We would need to recruit a new chair and new committee members.
    - Duane has a postdoc who could help but may not have enough background knowledge to lead. Not sure how to get someone up and running to participate well.
    - Discussion stalled at how to connect components of the community, including where GoaT fit in. Started with a spreadsheet with example projects to see how well they could interface with GoaT.
    - Who could we tap? Someone who submits genomes regularly and cares about having the metadata available in GoaT. Scott or Sheina? May be worthwhile pulling in Cibele at the beginning.
    - Frame to the community that this is an opportunity - we are building something for the community. Requires connecting i5k with GoaT. Outcome would likely be a protocol to submit information to GoaT, tuned to needs from the i5k community.
    - It would be worthwhile to discuss this at the next i5k cc meeting. Duane will be able to lead that discussion.
- Calendar invitations for i5k cc meetings
  - Marc has taken over the role of maintaining the mailing list
  - Lauren Roberts or others at ONP? Might want to move on from that model.
  - Keep up the calendar invitation - we agree that this is useful.
  - Brad can set up the calendar invite, since he has the capability to add and remove people without spamming everyone.
  - Should have:
    - Zoom link
    - Google drive that should contain the agendas: https://drive.google.com/drive/folders/1euuuNPTD7Y1rb7f-3gBDwItlkRfmqHRB
    - Maybe spell out a simple list of times, or time zone converter
    - Point to i5k website for those who are brand new. Also previous meeting notes: https://i5k.github.io/meeting-notes
  - Marc will send Brad the updated mailing list
- AGS 2024 - i5k 'lunch' scope

    - Opportunity to perform outreach to a new-ish community - may be a very different group than we typically see at AGS
    - What would this group like to see from i5k? Find out what they would like to be doing
    - How could we more readily connect with this group of people? Ways to participate that don't require online?
    - Similar to questions and conversations that we had at AGS2022
        - could take those as a starting point, but see what we have already answered;
        - include broadening participation
    - Would be better to have the 'what is i5k' talk be part of the session, than this discussion
    - Question to include: Would be nice to know what sort of collaborative opportunities are available. What sorts of resources are people looking for when engaging in collaborations internationally? E.g. access to expertise; or funding
- Discuss looking into NIMMS as a funding opportunity? https://www.nimss.org
    - Monica will add more information next week from her conversation with Fiona
    - Monica will also ask Kevin, Chris Elsik
    - Can talk about this at our next meeting
- How are the working groups going?
    - I5k standards is meeting!

12/11/2023

Attending:

Agenda (additional items welcome):

- Next i5k cc meeting:
    - will be chaired by: Brad
    - Cameo for this week's cc meeting: Rob Waterhouse
- How are the working groups going?
    - Community coordination WG has great ideas but has not been meeting. We should recruit new members for this WG. Challenge would be to find qualified people.
        - Current participants: Anna, Rob, Duane, Kristen
        - Met once, made some progress, wanted to post a final version of a spreadsheet for the community to populate. Anna and Rob have the most practical knowledge at this point.
        - *Duane will reach out to the WG members to ask if they can give a brief presentation on prelim results, to initiate a recruitment discussion. This will probably be a 15 minute discussion.
    - Standards WG: would like to present during the next cc meeting also. Purpose was to introduce our product so far to the larger group; **get feedback on issues to prioritize**; identify overlaps with other working groups. PRobably at 20 - 30 minute discussion .
    - Training working group: nothing to report, would be helpful to have them attend the above discussions.

    - Outreach/training: Monica will let Brad know that the agenda is getting pretty full.
- Idea from Anna - need discussion topics for the cc meetings. Perhaps this group can define what should be discussed in the larger group meeting? If the meetings are just report-outs people don't have much of an incentive to participate. Perhaps change the frequency
    - Marc - there's overlap between the executive committee and the core group of i5k members who attend the cc meeting. What is the function of core meeting vs. the executive committee meeting?
        - Executive committee goals: 1) coordinate agendas for larger meetings; 2) keep high-level overview of the larger i5k 2.0 project
        - I5k cc meeting:
            - Coordinate knowledge amongst all working group members
            - There can also be room for discussion topics
            - What would be attractive to newer recruits? May be intimidating to newer recruits to attend the meetings as is, as they lack some organizational knowledge etc. That said they can contribute a lot of new knowledge, perspectives from the trenches. Invite them as a review board (e.g. slide deck for standards)?
            - What about previous members of i5k that aren't coming anymore? How can we understand why they aren't coming/should we move on?
    - Consensus - it would be good to try out discussion topics for a while.
        - Advertise specific items in the email itself? Announce a topic in the email? E.g. this upcoming meeting would have the standards WG round-up as the topic, and some discussion on recruitment for the genome coordination working group.
        - For future executive committee meetings, come prepared with relevant topics that need to be discussed in the cc meetings

10/16/2023

Agenda (additional items welcome):

- Next i5k cc meeting:
    - will be chaired by: Monica
    - Cameo for this week's cc meeting: none so far.

9/18/2023

Attending:

Agenda (additional items welcome):

- Next i5k cc meeting:
    - will be chaired by: Marc
    - Cameo for this week's cc meeting: Monica

        - Duane is having trouble recruiting for the cameos - can't attend.
    - Discuss process improvement for agenda. Try to get updates in the agenda a day before the cc meeting, but if need be right before. A week before, send a meeting reminder with the draft agenda, no word doc.
- Updates from the working groups if needed
    - ICE proposal was accepted. AGS-X is also on; will include presentation from NIH CGR initiative, tailored to i5k. Biodiversity academy was useful. Josh will mention AGS plans?
- Next exec meeting scheduled for: October 16th. Brad will be out. Monica will reach out to Sue.
- **Monica will document process of adding the minutes to github, so others can do this as well - not done yet

7/24/2023

Attending: Marc, Kevin, Monica

Agenda (additional items welcome):

- **Monica will document process of adding the minutes to github, so others can do this as well
- Follow-up on the cameo process
- Next i5k cc meeting will be chaired by: Kevin
- Succession planning. How should we approach this? This needs to be a discussion item for our meetings.
    - How do you make sure that there are people to fill in the working group once a term is up? *Need to ensure there's a critical mass there to replace people from*.
    - First, need to make sure groups are established and running.
    - Next, see if we can relieve the person who's running them. (after a year or 2). Put that in the agenda a year from now?
    - On the other hand, it might help attract people if there is a term, so that you don't have to commit to more than the term (but can continue/renew if you want)
    - Wishy-washy statement - WG members will have 2-year renewable terms. WG members can opt out of their term if needed. WG chairs will keep track of terms.
    - Executive committee will review the WGs on an annual basis (each summer)
- Set a regular date for these meetings. Mondays at 1 Eastern, monthly, 2-ish weeks before the i5k cc meeting. Since there is often a holiday on Mondays, will still have to set up meetings ad-hoc. Monica sent out calendar invites through December.

6/26/2023

Attending: Monica Poelchau, Marc Halfon, Duane McKenna, Brad Coates

Agenda (additional items welcome):

- Any observations on/improvements for running the cc meeting?
    - Keep reminding people where the i5k cc google folder is - have the link in the agenda
- Follow up on action items from last meeting
    - Who will lead the i5k cc meetings? Kevin and Sue? **Round robin amongst us?** We'll come up with a schedule - let's try alphabetical. Next up is Brad.
        - Sue Brown, Brad Coates, Kevin Hackett, Marc Halfon, Duane McKenna, Monica Poelchau
        - Role of the chair - general awareness of the agenda, serve as timekeeper.
    - Succession planning. How should we approach this? This needs to be a discussion item for our meetings.
    - Minutes - note taking and distribution
        - Add minute approval to agenda
        - **Monica will document process of adding the minutes to github, so others can do this as well
        - Create a role for this (recording secretary), so that it's more attractive to ECRs?
    - Cameos
        - **Duane will reach out to specific people for the first few meetings.
        - **Monica will add the cameo sign-up sheet to the google document, create document in shared google folder, post in the meeting agenda.
    - What guidance do the working groups need for recruitment?
        - How large should the working groups get? Training decided around 4
        - ****Do we have the need to broadcast? Or just recruit directly?**
        - One of our goals is community building. WGs could make efforts to engage with individuals who are relevant to their WGs, but are currently outside of the i5k community.
        - Revisit recruitment efforts after a certain time - is this approach working?
        - **Advertising i5k to the broader community - broadcast revised structure, generate interest, having individuals show up for the general cc meetings. That generates a pool for the WGs. Advertise revamped i5k at AGS, AGSx 2024, ICE 2024 - how can we make i5k an appealing activity to be involved with?
        - Perhaps more advertisement on what goes on in the i5k cc meetings? Re-up social media presence?
        - Outreach WG could generate i5k slide for members to use at talks

    - Do we need an internal (i5k cc members) vs external (general i5k) communications (slack, email list)? E.g. post our monthly notes to Slack for external communications on what the i5k cc is doing? This thought came up when Monica was reaching out to an Australian group that would be great to coordinate with, but realistically can't come to our i5k meetings due to time zone problems. How do we keep colleagues who can't participate due to scheduling reasons informed? (this may be more of a question for the outreach/communications WG)
-

6/15/2023

Attending: Monica Poelchau, Marc Halfon, Kevin Hackett, Sue Brown, Duane McKenna

Agenda (additional items welcome):

- Follow up on action items from last meeting
    - Duane needs help organizing - set up a google doc for signup (3rd Wednesday of the month). Choose shorter (3 min) or longer (10 min) timeframe
    - Initiate conversation about this at the next cc meeting
- Items for i5k cc agenda from this WG
    - Agenda:https://docs.google.com/document/d/10saiUmqU6-_GzfeXJdIEjGLzHOfSup-gTS5u4DzjiK4/edit
    - How are we going to advertise this? Have Sharon continue to email the list. Sharon.roberts@usda.gov
    - Permissions: open to view for all; to edit for specific people.
    - Add a comment on whether any edits are needed for the previous meeting's notes
    - ***Action item: All of us need to populate the agenda by the end of the day today.
    - Marc will send the link to Sharon, and she'll send it out to the list
- Future discussion items (next agenda):
    - Who will lead the i5k cc meetings? Kevin and Sue? **Round robin amongst us? ***Action item:** We'll come up with a schedule. Next up is Sue.
    - Zoom: Monica can still provide they link.
    - Invites: Sharon. Might want to revisit later.
    - Succession planning. How should we approach this? This needs to be a discussion item for our meetings.

    - Facilitating interactions between working groups. How should this happen? Do we need to facilitate this? Or just encourage it?
        - Schedule regular communications between working groups, i.e. in this meeting
    - How will cc meeting advertising go? Sharon Roberts?
    - Minutes - note taking and distribution
    - What guidance do the working groups need for recruitment?
        - How large should the working groups get? Training decided around 4
        - Do we have the need to broadcast? Or just recruit directly?
    - Do we need an internal (i5k cc members) vs external (general i5k) communications (slack, email list)? E.g. post our monthly notes to Slack for external communications on what the i5k cc is doing? This thought came up when Monica was reaching out to an Australian group that would be great to coordinate with, but realistically can't come to our i5k meetings due to time zone problems. How do we keep colleagues who can't participate due to scheduling reasons informed? (this may be more of a question for the outreach/communications WG)
- Report from the training WG: planning on making short video tutorials. Use Mash-ups?

5/30/2023

Attending: Monica, Duane, Brad, Marc

Agenda (additional items welcome):

- Review action item list from last meeting to identify group composition/recruitment goals
    - Who should be on this committee? One representative from each working group.
    - Might also want to tap Kristen and Rob.
    - **Action item: ask each working group to provide a member for our working group, and an alternate. The alternate would attend when the primary member can't come.
        - Standards: Monica and Marc are already in the exec WG
        - Community building and Outreach: Brad is already in the exec WG
        - Training: Sue is already in the exec WG
        - Genome project coordination: Duane is already in the exec WG
        - Prioritize action items that are needed rapidly for new working groups
    - Set up a process for providing an agenda for the i5k cc meetings each month
        - Made a template: https://docs.google.com/document/d/1Kn-WhY9QGtfIMCc6qFLBXwDuQjMNISQeOk6F6nUWCZo/edit

        - **Action item: Someone will need to set up a google doc with the agenda for each cc meeting, make sure it's accessible to others prior to the meeting. They will determine who will be in charge of editing and distributing the final agenda before the cc meeting.
            - Exec member will set up a new agenda document from the gdoc template prior to the cc meeting (e.g. have it as a link during the i5k cc meeting so everyone knows);
            - Advertise the draft agenda doc for editing by the cc during the cc meeting;
            - Editing: occurs at your discretion prior to the cc meeting
        - Introductions for new members should be on the agenda. Welcome, they should prepare an elevator speech on their work and why they're joining the i5k cc.
        - Highlights (2-3 minutes max) from each working group to avoid overlap and increase synergy - that should be built in. The working groups should prepare bullet points for the meeting to structure the update, which they can paste into the meeting doc. (the i5k cc meeting shouldn't be the place for business to be worked out.)
        - Each WG can provide additional discussion items for the agenda that require some discussion with the larger cc meeting (example: AGS organization discussion from the Outreach WG). They can add these items on the google doc prior to the meeting. Someone from the exec committee will then finalize the agenda as appropriate.
        - Other items to highlight can be added if needed (e.g. updates from the EBP; other items that are germane for the i5k cc).
        - **Action item: Organize cameos. Every meeting, one member of the cc shares a 5-10 minute, informal presentation on highlights of the work that they're doing. Could create a spreadsheet with future dates, have individual cc members sign up.
    - **Action item: Set up a gdoc folder structure for all working group notes
        - This will allow everyone to review what is going on in other working groups
        - Advertise at next i5k cc meeting
    -
- Future discussion items (next agenda):
    - Succession planning. How should we approach this? This needs to be a discussion item for our meetings.
    - Facilitating interactions between working groups. How should this happen? Do we need to facilitate this? Or just encourage it?
        - Schedule regular communications between working groups, i.e. in this meeting
    - How will cc meeting advertising go? Sharon Roberts?
    - Minutes - note taking and distribution
    - What guidance do the working groups need for recruitment?

- Suggestion for Outreach WG: it is helpful for the community to hear different vantage points from the community: Regular updates from individuals or organizations in i5k. Audience: everyone in i5k. How to do this: blog posts from the community; quick updates in the i5k cc meeting; etc.
-

5/15/2023

Attending:

Agenda (additional items welcome):

- Review i5k executive committee goals, rationale, and ideas
- Identify group composition/recruitment goals
- If we have time, map out items to discuss (E.g., set meeting agendas; determine terms and succession plans for working groups; determine terms and succession plans for i5k steering committee; vet or suggest new ideas for the i5k community to work on.)

Notes:

- General agreement about the goals.
- Potential Executive committee invitees:
    - Kristen Panfilio (great understanding of the community)
    - Rob Waterhouse (great understanding of the community)
    - Have a member of each WG be part of this committee?
- It's also possible to invite others temporarily for input on a specific issue
- Possible goals:
    - We may want to rebrand this group (i5k) - this could be a discussion item for this group. Could change the taxonomic scope. Our umbrella name should reflect terrestrial arthropods; hexapods; not insects. This would help include others working on non-insesct terrestrial arthropods that may not think they're included in the taxonomic scope due to the 'i'
        - Kevin - changing branding may be difficult, since it's already associated with products, such as the i5k website. At one point, there were discussions of merging i5k and GIGA! That said it would be good to find a way (including changing i5k) to be inclusive of terrestrial arthropods
        - **Could we keep i5k but add a tagline that better defines what that means ("genomics of terrestrial arthropods" or other)
        - Currently we handle chelicerates and hexapods. Crustaceans are handled by GIGA.
    - Setting meeting agendas.

        - Every month, Kevin comes up with a meeting agenda. This has been dominated by visioning the past couple of months.
        - How would we want to do this?
            - Determine this in one of our WG meetings, and make sure we meet a week or so before our larger group meetings
            - Have each subcommittee member set an agenda item? Could consider having one member of each WG be a member of this committee.
        - It would be worthwhile to build contributions from someone new each time (their research; new grants; etc. 'cameos') into the larger meeting - e.g. 10-15 minutes. THe goal would be to 1) hear new and interesting topics relevant to the larger group and 2) build community esp. With new group members
            - Webinar series that are being organized are good, but we've lost the short talks - great idea
            - Definitely remember to have new members introduce themselves when they join the group. But also give them a chance to get to know the existing members of the group
            - Encourage in-person meetups when possible
            - Perhaps suggest this to outreach WG?
- Finalize our i5k charter (mission, vision, goals) and pass on to outreach WG for display on the website
- Organizing the working group work
    - Term limits
    - Succession plans
    - Working groups (usually more permanent) vs. task teams (defined time limits based on the task)
        - Example of task team: paper on '10 ways to not sequence a insect genome'
    - Should the executive committee be involved in the working group work?
        - Should the working group determine their leads? Probably
    - Is it okay if we use the word 'committee' per USDA? Working group vs. subcommittee?
        - Working group implies work needs to be done and accomplished.
        - Would be helpful to have 2 leads, as this adds accountability and regularity. Kevin has seen this as chair (lead) and executive secretary (sets up the next meeting, making sure that meetings happen and that emails are sent). AgBioData has chair and co-chair. Organizationally, make sure that the same people don't get tapped over and over.
    - We could make sure that the same people aren't leading too many working groups to avoid burnout.
    - Also, make sure that the working groups don't overlap in their tasks.
    - Working groups should limit themselves to few tasks (one or two) - otherwise it will be too much.
- Mailing list?
- **Recruit new people to the group?
    - Include those interested in population genomics, other applications besides just genome sequencing.

- Schedule next meeting tuesday in 2 weeks, same time

I5k executive committee

Goals: Determine i5k's general direction and how it does its business. E.g., set meeting agendas; determine terms and succession plans for working groups; determine terms and succession plans for i5k steering committee; vet or suggest new ideas for the i5k community to work on.

Rationale: Having a designated committee focused on how we work and what we work on will improve our organization and help prevent burn-out.

Ideas:

- It is worth re-thinking the i5k cc meeting agendas. It will be more useful to come together to hear what different subgroups have accomplished. Provide the community with a report on how the larger community is moving forward. This may also provide a mechanism for the cc to write an annual report on i5k activities.
- Change incentives for participation.

shared email/social media solutions

Potential solutions for shared email and social media accounts

From Microsoft Co-Pilot. Overall recommended solutions are at the end. Pricing would be up to $60/year depending on solutions, options, and number of people with access. Together with Squarespace costs (for the web site) of ~$350 annually, that would give i5k an operating budget of roughly $400/year.

Potential solutions for shared email and social media accounts
- Overview of solutions:
- Pricing info:
- Recommendation for a small nonprofit:

Overview of solutions:

For an organization, a password manager is usually the safest way to let multiple people access a Bluesky account without emailing passwords around.

Option 1: 1Password (my top recommendation for organizations)
Go to https://1password.com/business
Create a team or business account.
Invite staff members via email.
Create a vault called something like "Social Media."
Save the Bluesky username, password, and recovery information in that vault.
Give access only to the people who need it.
When someone leaves the organization, remove their access without changing every password.

Benefits:

Easy sharing
Strong security
Access logs
Works on phones and computers
Option 2: Bitwarden (excellent and less expensive)
Go to https://bitwarden.com
Create an Organization.
Invite members.
Create a collection called "Communications" or "Social Media."
Store the Bluesky credentials there.
Assign permissions to members.

Benefits:

Lower cost
Open source
Good for nonprofits and academic organizations
Option 3: Microsoft Password Management

If your organization already uses Microsoft 365:

Microsoft Edge can securely store and sync passwords.
Microsoft Entra ID (formerly Azure AD) can manage access and identities.
However, for shared social media credentials, 1Password or Bitwarden are typically easier to administer.
Recommended setup for a small organization

If you're a department, lab, society, or nonprofit with 3-10 people:

Create a dedicated email address (e.g., social@organization.org).
Use that email for the Bluesky account.
Store the Bluesky credentials in 1Password or Bitwarden.
Give access only to the communications team.
Keep 2-3 people as administrators.
Document who is authorized to post.

Example:

Social Media Vault
├── Bluesky
├── X / Twitter
├── LinkedIn
├── Facebook
└── Instagram

This approach scales well and avoids having to change passwords every time a volunteer, intern, or staff member leaves.

==========

Pricing info:

For a small nonprofit, the cost can be surprisingly modest.

Option A: Google Workspace + Google Password Manager

If you're already using Google Workspace, Google Password Manager is included with Google accounts, so there is no separate password-manager subscription fee.

Typical cost:

Google Workspace Business Starter: about $7/user/month on annual billing (or about $8.40/user/month flexible billing). Includes custom email, Gmail, Drive, Docs, Meet, and admin controls.

For example:

3 users: about $21/month
5 users: about $35/month
10 users: about $70/month

This is the lowest-cost route if all you need is:

A shared organizational email address
Basic password sharing
Google-based administration
Option B: Google Workspace + Bitwarden

Many nonprofits choose this because Bitwarden is designed specifically for sharing credentials.

Approximate cost:

Google Workspace Starter: $7/user/month
Bitwarden Teams: about $4/user/month (annual billing)

Example for 5 staff:

Google Workspace: 5 × $7 = $35/month
Bitwarden: 5 × $4 = $20/month

Total: ~$55/month

Option C: Google Workspace + 1Password

This is usually the easiest solution for nontechnical teams.

Costs vary by plan and nonprofit discounts, but expect a higher price than Bitwarden. 1Password offers nonprofit pricing/support programs for eligible organizations.

A rough budget for a small team is often:

Google Workspace
+ 1Password team plan
≈ $10-$15 per user/month total

Actual nonprofit pricing may be lower depending on eligibility.

Recommendation for a small nonprofit:

If you have:

Fewer than 10 people
One Bluesky account
A few other shared accounts (LinkedIn, Zoom, Canva, etc.)

I'd choose:

Google Workspace Business Starter
+
Bitwarden Teams

You get:

Professional email (social@organization.org)
Shared inboxes and Google Docs
Secure password sharing
Shared 2FA codes
Easy offboarding when volunteers leave

That's usually the best balance of cost and security for nonprofits.
