Kansas State University Scholarly Output KPI Report

Code

> This report keeps two distinct layers: an external publication benchmark using OpenAlex and Scopus, and a supplemental local public-access infrastructure view using K-REx / DSpace, New Prairie Press, Tallgrass. Local-platform outputs are not added to the benchmark publication numerator.

Data status and interpretation

Snapshot status: complete
Last provider refresh: 2026-08-31T19:42:45.482Z
Latest benchmark period: 2026 YTD

Source completeness summary: complete, stale, partial, and missing states are never treated as equivalent

source	connector	years_expected	years_complete	years_stale	years_partial	years_missing	last_refresh	records	status
krex	dspace	11	11	0	0	0	2026-08-31 17:13:25	0	complete

> Recent-year citation impact is immature and can move sharply as citations accrue. FWCI and percentile metrics are OpenAlex-specific and must not be combined with Scopus/SciVal normalized indicators. Corresponding-institution share is a directional metadata proxy, not a complete measure of research leadership.

Executive summary

Kansas State University gains and lags - 2026 YTD

Metric	Kansas State University	Peer median	Aspirational median	Rank	Gap vs peer	Gap vs aspirational	Signal
Publication volume	1,736.0000	3,290.0000	3,855.00000	11 of 12	-47.2%	-55.0%	Below peer median
Publication growth CAGR	-4.2%	2.0%	0.1%	12 of 12	-6.2%	-4.3%	Below peer median
Open access share	73.2%	68.9%	72.4%	5 of 12	6.1%	1.1%	Above peer median
Citations per publication	0.37	0.26	0.27	1 of 12	43.8%	34.9%	Above peer median
Mean FWCI	3.03	2.27	2.69	2 of 12	33.5%	12.5%	Above peer median
Median FWCI	0.00	0.00	0.00	1 of 12	NA	NA	Insufficient data
Top 10% citation share	23.1%	21.1%	22.5%	2 of 12	9.4%	2.9%	Above peer median
Top 1% citation share	4.0%	2.5%	3.4%	1 of 12	58.7%	19.4%	Above peer median
Corresponding-institution share	37.3%	39.6%	39.0%	9 of 12	-5.8%	-4.4%	Below peer median
International collaboration share	41.4%	34.7%	37.7%	2 of 12	19.3%	9.9%	Above peer median

OpenAlex benchmark

Benchmark counts use whole counting: a work is credited to each institution represented in its OpenAlex affiliations. They are useful for institutional trend and cohort comparisons, not for allocating credit among coauthors or units.

Open access and citation impact

OpenAlex and Scopus source comparison

Source-specific totals; do not merge citation counts across systems

Source	Records	DOIs	Citations	OA share	Citations / record
openalex	1736	1678	641	0.73	0.37
scopus	1325	1313	0	0.53	0.00

Cross-source reconciliation

DOI matches are highest confidence. Title/year fallback is used only when no DOI is available and ambiguous candidate groups are flagged for review.

Cross-source reconciliation counts

metric	record_count
OpenAlex only	13078
Scopus only	7131
OpenAlex + Scopus DOI match	16532
Title/year fallback match	33
K-REx matched to external index	0
NPP matched to external index	1571
Unmatched DOI-bearing local records	1912
Ambiguous candidate groups	155

First 25 source-only or unmatched DOI-bearing local records; complete exports are included in the snapshot and workbook

publication_year	doi	title	sources	reconciliation_category	ambiguous_match

Scopus benchmark

Sources and topics

Collaboration and corresponding role

Local scholarly infrastructure

Configured repositories and publishing platforms are public-access infrastructure. Platform totals describe hosted outputs, not Kansas State University research output, and are never added to OpenAlex or Scopus publication totals. Target affiliation is confirmed only by auditable source evidence or a validated external institution match; missing or unmatched evidence remains **unknown**.

Platform output, affiliation classification, and DOI/index visibility (affiliated share denominator: all platform outputs)

KPI drivers against the peer cohort

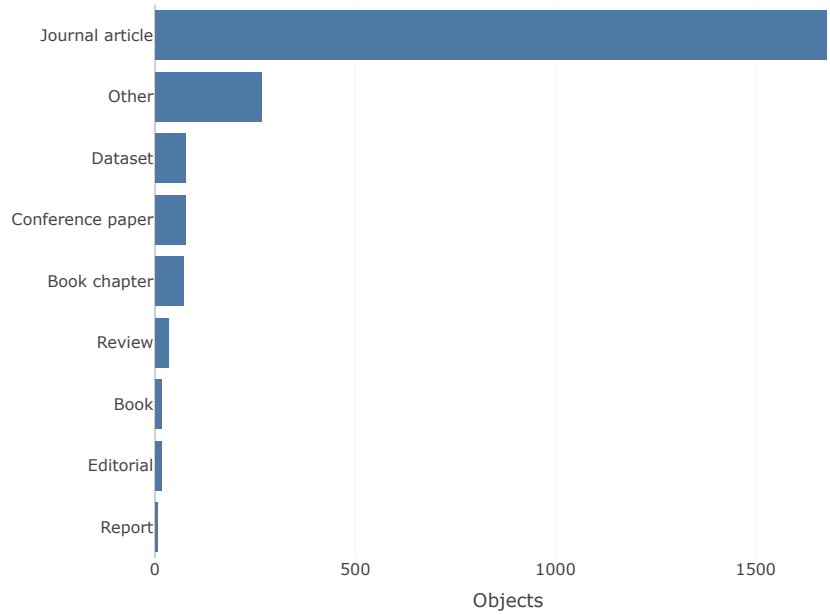

The decomposition identifies which subject areas and publication sources contribute most to Kansas State University's gap against a normalized peer-median profile. Publication volume separates scale from composition. Citations per publication separates composition from within-category performance. Contributions reconcile to the modeled overall gap; they are descriptive, not causal.

Largest OpenAlex KPI drivers - 2026

Exploratory trend analysis

Trend estimates are descriptive, not forecasts or causal claims. Current-year observations should not be compared with full years without a year-to-date adjustment.

publication_year	publication_count	publication_yoy
2016	3642	NA
2017	3768	0.035
2018	3839	0.019
2019	3767	-0.019
2020	3921	0.041
2021	3609	-0.080
2022	3453	-0.043
2023	3351	-0.030
2024	3116	-0.070
2025	3209	0.030
2026	1876	-0.415

term	estimate	std.error	statistic	p.value	conf.low	conf.high
(Intercept)	270461.318	74872.429	3.612	0.006	101088.116	439834.52
publication_year	-132.136	37.047	-3.567	0.006	-215.943	-48.33

Methodology and appropriate use

- Use cohort medians and trends to discuss institutional signals; do not rank researchers, departments, or colleges.
- Preserve source-specific totals. OpenAlex and Scopus coverage and citations legitimately differ.
- Benchmark metrics are whole-counted at the work-institution grain.
- DOI-first reconciliation is the highest-confidence match. Title/year fallback matches require review.
- Treat 2019-2022 or another explicitly selected mature window as more stable for citation-impact interpretation.
- Keep configured local platforms on the separate infrastructure layer.
