K-STATE LIBRARIES
UNCLASSIFIED EVALUATION PROCEDURES

PART A
GUIDELINES FOR PREPARATION OF PERFORMANCE PLAN

PART B
ANNUAL EVALUATION INSTRUCTIONS

PART C
PROCEDURES FOR BELOW STANDARD PERFORMANCE

PART D
PROFESSORIAL PERFORMANCE AWARD

PART E
POST TENURE REVIEW

Purposes of Evaluation:

Unclassified evaluations form the basis of decisions concerning annual merit salary, reappointment, tenure, and promotion. More than that, evaluations are a roadmap providing direction for faculty development. Evaluations provide documentation of past performance and accomplishments as well as finite future expectations. They are used to assess an individual's progress and to guide the growth of skills and expertise. This ongoing cycle of individual assessment and improvement aids in continuing productivity throughout the course of the individual's career as well as promoting consistency with the role and mission of the university and library.

PART A

GUIDELINES FOR PREPARATION OF PERFORMANCE PLAN

1. The Performance Plan is prepared at the beginning of the evaluation year (calendar), when the position description is reviewed, and a copy of both are submitted to the Administrative Office. Please see page 4 below for details.

2. Performance expectations reflect position description responsibilities, departmental goals and personal goals. They should support the Libraries' strategic plan, mission and/or vision. They should be specific, measurable in some manner, acceptable and realistic to both the individual and supervisor, and should be attainable.

3. For tenured and tenure track faculty, who will use these expectations to assist in tenure and/or promotion, performance expectations will address or include the traditional categories of directed service, non-directed service, and research/creative activities.

4. Each expectation should be given a weight of "high", "medium" or "low" to indicate its importance.

5. The individual prepares a draft Performance Plan document in collaboration with the supervisor. A final version of the Performance Plan is signed by employee and supervisor.

6. Progress will be reviewed regularly throughout the year, with a mid-year review at the minimum. Expectations may be modified as circumstances warrant, by mutual agreement. Modify Performance Plan or attach hand-written modifications to existing Plan and submit a copy to the Administrative Office.

7. Professional Conduct: In accordance with section D12 of the University Handbook, "Performance reviews of faculty and other unclassified employees will include consideration of overall contribution or detriment to the department/unit, which includes citizenship and other personal conduct affecting the workplace (see Section C46.1UH)".

PART B

ANNUAL EVALUATION INSTRUCTIONS

Below are the steps for completing your unclassified evaluation. Please complete these steps in the time frame indicated by the current Unclassified Master Calendar (located on K-State Libraries Intranet) and supervisor. For additional information, consult the University Handbook.

1. Employee completes self-evaluation addressing core responsibilities for the year as defined in the position description and the annual unclassified performance plan.

2. Supervisor completes evaluation determining the individual's merit salary category, according to K-State Libraries Standards for Evaluation, and reflected by the *final overall rating*. Please see page 3 for details regarding the standards for evaluation.

3. Supervisor shares evaluation with unclassified staff member.

4. Supervisor forwards evaluation materials to Library Administration through HR Office. "The dean will review evaluation materials and recommendations." (C47.1 UH). "A dean who does not agree with recommendations for merit salary increases made by a unit head must attempt to reach consensus through consultation. If this fails, the dean's recommendation will be used. If any change has been made the dean must notify, in writing, the individual of the change and its rationale." (C47.2 UH)

STANDARDS FOR EVALUATION

Performance Standards	Definitions
Exceptional	Recognized for excellence in core position responsibilities and Performance Plan expectations through awards, recognition, or written statements from K-State, from the Libraries, or from recognized professional organizations. Examples including but not limited to: implementation of workflows that save staff time/library resources/money or implementation of enhanced tools and services; cited or depended on as a regional or national authority; significant external funding on grants or targeted excellence; presentations at national/international conferences; publication of scholarly research; invited book reviews; national recognition for service to one's profession; significant service to the university and/or to the Libraries which supports the mission and goals of the organization; significant participation in state, national or international organizations
Exceeds Expectations	Meets all annual Performance Plan expectations and performs core position description responsibilities at an above standard level of performance. Examples including but not limited to: presentations at local/state/regional level; effective participation or leadership roles in library teams/committees; active participant on university, local, state or national professional organizations/committees; exploring the boundaries of one's role by contributing to librarianship or service to one's profession
Meets Expectations	Meets annual Performance Plan expectations. Standard level of performance of core responsibilities. Ability to work independently, as well as collaboratively. Examples including but not limited to: active participation on K-State Libraries teams/committees; attending relevant professional meetings/workshops; writing book reviews in non-scholarly, non-professional publications; collegiality/interpersonal skills that contribute to harmonious workflow and/or patron relations
Minimum Standard	Fails to meet one or more annual performance expectations or core responsibilities but capable of improvement
Below Standard	Fails to perform the requirements of most core responsibilities and annual Performance Plan. Lacks initiative. Poor decision-making and judgment skills. No active participation on teams/committees. Requires close supervision and/or direction to complete required tasks. Poor collegiality/interpersonal skills that disrupt harmonious workflow and/or causes poor patron relations. C31.5 (chronic low achievement) is invoked when a tenured faculty member receives a final overall rating that is below standard.

Weight Reference Key (Supervisor and Supervisee)

Assigned Weight	Description of Weight	Impact on Evaluation
High	This area emphasizes a **High** level of commitment from the employee in either time, resources, or importance. Examples include but are not limited to: Publication, panel, major project, actions with a significant impact on the organization	**(Discussion between Supervisor and Supervisee)**
Medium	This area emphasizes a **Medium** level of commitment from the employee in either time, resources, or importance. Examples include but are not limited to: Standard workload/time commitment, normal project with no special time commitments or particularly heavy impacts, actions with notable impacts	**(Discussion between Supervisor and Supervisee)**
Low	This area emphasizes a **Low** level of commitment from the employee in either time, resources, or importance. Examples include but are not limited to: Projects with minor impact on the organization and no specific end date, actions with low impact, minor levels of committee involvement	**(Discussion between Supervisor and Supervisee)**

*FINAL OVER-ALL RATING: Exceeds Expectations

* For tenured faculty, a final overall rating of BELOW STANDARD leads to the implementation of section C31.5 (“Chronic Low Achievement” of the KSU University Handbook. See Part D.)

Unclassified Self-Summary
(Must be typed)

Each unclassified employee is required to complete self-summary. Continue any section on additional sheets of paper.

NAME: Molik David _____ _____ YEAR:
(Last) (First) (Initial)

Academic Rank: Associate Professor Job Title: Department Head

Dept: Center for Scholary Communication

Performance Expectations / Core Responsibilities:
Assess performance of duties as outlined in the annual Performance Plan and the position description.

Introduction

I started at Kansas State Libraries in February of this year. Looking back on this evaluation period, I would characterize my work as strategic, intentionally ambitious, and necessarily iterative. The Center for Scholarly Publishing—now the Open Publishing Exchange (OPE)—represents a broad and evolving portfolio spanning scholarly publishing, emerging data services, professional development, and institutional strategy. Ideally such an organization should be able to affect real change in both Kansas State's research enterprise, as well as be a force in student success. This year marked a period of transition for both the department and the Libraries, and while this breadth occasionally required balancing depth against momentum, the overall impact has been positive in positioning OPE for its next phase of growth.

During the evaluation period, I met and exceeded expectations outlined in my Unclassified Professional Plan (UPP) through sustained leadership in directed service, meaningful engagement in non-directed service, and continued scholarly and creative activity aligned with my role as Department Head. In parallel with administrative responsibilities, I maintained active involvement in scholarly publishing, research dissemination, and standards development that directly support the mission of the Libraries and the University.

One of the most significant lessons I learned this year is the importance of pacing and structural clarity when leading change. Initiatives such as launching a new journal, reshaping open textbook governance, and advancing data curation capacity all benefited from early vision-setting, but also revealed how essential it is to clearly articulate decision points, ownership, and sustainability early in the process. I also gained a deeper appreciation for how much institutional change depends on informal relationship-building alongside formal structures.

If I were to approach this year again, I would be more deliberate about narrowing the number of simultaneous new initiatives and more explicit about delegation at earlier stages; however, I also recognize that some breadth was inevitable given the department's scope and the Libraries' evolving needs. While I am comfortable working across domains, I recognize that long-term success of the department depends on ensuring that projects are not overly dependent on individual effort, and that faculty and staff expertise is surfaced and empowered as early as possible.

Looking ahead, I would like to see several of these efforts transition from launch mode to shared ownership and refinement. In the future, I would prioritize bringing additional stakeholders into planning conversations earlier,

particularly colleagues in Research IT, the Provost's Office, and faculty partners, so that initiatives mature with broader institutional buy-in. I recognize that doing this while retaining the speed at which the department is able to innovate may be difficult, but my goal is to continue evolving from hands-on implementation toward a more facilitative leadership role that emphasizes alignment, sustainability, and capacity-building.

As Department Head of the Open Publishing Exchange, I led a team of three Scholarly Communication librarians and authored a departmental landscape document that served as the basis for the department's strategic direction. I established priorities focused on reorganizing the Open and Alternative Textbook Initiative, building a Research Data Management and Curation program, and leveraging library assets such as New Prairie Press to pursue university-level responses to the serials crisis. In addition, I provided information and analysis to Libraries leadership through a Virginia Tech Libraries site visit and report, attendance at the Center for Networked Information meeting, and liaison work with Research IT and the Provost's Office related to Wildcat Scholar and Kansas State University's CRIS/RIMS planning.

As part of this evaluation cycle, I co-founded and launched *Cyberbiosecurity Quarterly* as Co-Editor-in-Chief, establishing a new peer-reviewed scholarly venue hosted on New Prairie Press. In its inaugural year, I led a seven-person editorial team, contributed to editorial governance and workflow development, and personally reviewed multiple manuscript submissions. I also contributed to peer-reviewed research outputs during the evaluation period, including middle authorship on articles published in *microPublication Biology* and *Genetics* ("Guidelines for Gene and Genome Assembly Nomenclature"). While the majority of the *Genetics* manuscript was completed prior to my current position, I finalized contributions and supported the work through publication during this evaluation cycle. In addition, I co-authored the *System Security Assessment Plan Template*, a Research Data Alliance working group output released in November 2025. These scholarly and creative activities provide context for the service contributions described below and reflect sustained engagement with communities relevant to my UPP responsibilities.

Professional Conduct

Throughout the evaluation period, I interacted cooperatively with colleagues and campus partners, demonstrating civility, respect, and professionalism consistent with University Handbook C46.1. I showed respect for differing viewpoints in the exchange of ideas and followed appropriate supervisory guidance while exercising independent judgment in the execution of my responsibilities. I maintained a professional and collegial demeanor in all internal and external interactions.

Directed Service

<u>Core Responsibilities (High)</u>

During the evaluation year, I fulfilled and exceeded my core responsibilities as Department Head for the Open Publishing Exchange. I provided leadership and oversight for scholarly publishing, open educational resources, and research-support services, ensuring alignment with Libraries and University priorities. I balanced administrative, supervisory, and strategic responsibilities while representing the Libraries in campus-wide discussions related to scholarly communication, research infrastructure, and compliance.

Complete K-State Supervisory Foundations (Med)

I completed the required K-State Supervisory Foundations training, strengthening my capacity in personnel management, communication, and application of University policies. Knowledge gained through this training informed my approach to staff supervision, mentoring, and performance evaluation.

In addition, I engaged in professional development and leadership training opportunities to strengthen my effectiveness as a Department Head. These included participation in Harvard's Leadership Institute for Academic Librarians (LIAL), the K-State Fall New Department Head Institute, and the University of Kansas Assessment in Action Workshop. Collectively, these experiences enhanced my capacity in strategic leadership, organizational assessment, personnel management, and evidence-based decision-making.

A key lesson from these experiences was the importance of explicitly separating strategic direction from operational execution in supervisory contexts (i.e., when to think through a problem and when to act). As a result of these trainings and experiences, I became more deliberate about clarifying expectations, documenting decision rationales, and distinguishing between strategic conversations and implementation or working meetings. I applied these lessons by adjusting how I structure project check-ins and how I contextualize department- and project-level meetings.

Build Data Curation and Management Program (High)

I made substantial progress toward building a data curation and management program aligned with FAIR principles and federal open-access mandates. I served as a library liaison to the Office of Research on issues related to data repositories, compliance with the Nelson Memo, and CRIS/RIMS planning. This work positioned the Libraries as an active partner in campus research infrastructure planning.

As part of this work, I conceived and organized the "Tea with CSP" discussion series, facilitating informal but substantive conversations on scholarly communication, open publishing, and research infrastructure. These discussions included participation by national leaders such as James Butcher and Natalie Meyers and supported professional development within the department.

A key lesson from this work was that successful data curation and management programs depend as much on relationship-building and shared vocabulary as on technical infrastructure. Early conversations revealed differing assumptions across units about ownership, scope, and responsibility for data services. In response, I began emphasizing discussions framed around researcher workflows and compliance needs—that is, approaching challenges from a research lifecycle perspective rather than focusing narrowly on individual projects or isolated services.

OPE Processes and Procedures Updating (Med)

I led internal efforts to review and update CSP/OPE processes and procedures, including scholarly publishing workflows, editorial governance, and service models. This work included alignment with emerging publishing platforms such as Fulcrum and Janeway and refinement of internal documentation to support consistent and sustainable operations.

A key lesson from this work was the importance of making implicit workflows explicit. As processes were reviewed

and updated, it became clear that undocumented practices can create unnecessary friction and limit scalability. This reinforced the value of clear documentation and shared reference points to support consistency, continuity, and onboarding as the department's scope continues to evolve.

Build OER Program (High)

I expanded and supported the Open and Alternative Textbook Initiative (OATI), contributing to increased faculty engagement in open and alternative instructional materials. A significant component of this work involved designing a new support structure for OER services, including drafting bylaws for a reorganized OATI committee. The revised committee structure will take effect in early 2026.

A key lesson from this work was that sustained growth in OER programs depends on clear governance and shared ownership rather than ad hoc support. While faculty interest is critical, long-term success required formalizing decision-making structures and roles to ensure continuity, transparency, and institutional commitment. This insight directly informed the design of the revised OATI committee structure.

Non-Directed Service

Data Curation and Data Analysis Training (Med)

I contributed to data curation and analysis training beyond my directed responsibilities by serving as an instructor for the Incoming Life Sciences Student Carpentries Program. I also participated in monthly Great Plains Network Carpentries Instructor meetings, contributing to curriculum discussion and regional coordination.

A key lesson from this work was that sustainable data training depends on building shared instructional capacity rather than relying on individual expertise. Participation in regional instructor coordination highlighted the value of common curricula, peer feedback, and distributed teaching models. These experiences informed how I think about scaling data literacy efforts beyond single workshops or programs.

EHS Committee (Low)

I fulfilled my responsibilities as a member of the EHS Committee, participating as required and contributing to committee activities consistent with its scope and charge. As my service on this committee began during this evaluation period, this year focused primarily on orientation and gaining familiarity with the committee's scope, processes, and priorities, which will inform deeper engagement in future cycles.

Wildcat Scholar Committee (Med)

I served on the Wildcat Scholar Committee, contributing scholarly communication and research infrastructure expertise to discussions related to research visibility, repository integration, and institutional research profiling. This year focused primarily on orientation and gaining familiarity with the committee's scope, processes, and priorities, which will inform deeper engagement in future cycles.

Research and Creative Context

In parallel with the service activities described above, I maintained engagement in scholarly and creative activities that support my UPP responsibilities. These activities complement and reinforce my directed and non-directed service contributions in scholarly communication, publishing infrastructure, and research data governance.

A key lesson from maintaining this engagement was the value of remaining an active participant in scholarly communities while serving in an administrative role. Continued involvement in research and standards development helped ground strategic and operational decisions in current disciplinary practice, ensuring that service and infrastructure initiatives remained responsive to researcher needs.

This reciprocal relationship between scholarship and service has been a defining feature of my approach during this evaluation period.

EVALUATION COMMENTS

MANDATORY FOR SUPERVISOR (S)

David Molik — 2025

(Name of person evaluated) — (Year)

Comments on the Year's Performance:

It has been an honor to work with David over the past year. From day one, he hit the ground running and hasn't slowed down since. In his first week, he already had plans and appointments to meet with current and prospective partners, actively making connections and advocating for the department and its work.

Stepping into a new department head role at a new organization comes with challenges and requires time to learn about the culture. I've seen David approach this with care, thoughtfulness, and kindness. In addition to bringing significant supervisory experience, he participated in Supervisory Foundations and attended the New Department Head Institute, which introduced him to K-State's rules and regulations and provided opportunities to connect with other new department heads. I attended the institute as well and observed him actively engaging in discussions and promoting his department. These conversations allowed him to highlight the services his department offers and educate others about current trends and issues in scholarly communication.

David has guided his department more effectively than I could have hoped for someone new in the role. From building a data curation program to updating processes and leading a department name change, he and his team have accomplished a great deal in just one year. I'm excited to see what comes next.

I also want to highlight David's strong start in nondirected service, particularly his work with the Wildcat Scholar Committee. This is a new campus initiative, and while adoption is mandated, it will require significant faculty engagement. I've been in the room when David explained and demonstrated the platform in ways that clearly convey its value and importance, better than I've seen from some campus leaders. Wildcat Scholar aligns naturally with his department's mission, and I hope he continues to play a key role in its success.

Finally, I'm deeply impressed that David co-founded and launched Cyberbiosecurity Quarterly. This is a significant endeavor and serves as a model for others.

Consultation Acknowledgment

I have had the opportunity to review the evaluation document and discuss it with the evaluator(s) for the above stated rating period.

EVALUATION COMMENTS (CON'T)

Comments by person evaluated: (Optional)

I want to express my sincere appreciation for Tara's thoughtful feedback and support this year. It has been a genuine pleasure to work with her, and I deeply value her perspective, judgment, and advice. Her willingness to serve as a trusted confidant and sounding board, particularly during moments of transition and decision-making, has been invaluable to my growth and effectiveness in this role.

PART C

PROCEDURES FOR BELOW STANDARD PERFORMANCE

Below standard performance is addressed for Faculty on Probationary Appointments (C50.1 UH), Unclassified Administrative Appointees (C170.3 UH), and Instructors (C60 UH) through the yearly reappointment procedures. The following procedures, for tenured faculty only, are in compliance with Sections C31.5-C31.8 ("Chronic Low Achievement") of the University Handbook. These sections address the "chronic failure of a *tenured* faculty member to perform his or her professional duties," defined as "when a tenured faculty member's *overall* performance falls below the minimum acceptable level, as indicated by the annual evaluation." Within K-State Libraries, C31.5 is invoked when a *final overall rating* falls below standard.

I. Supervisor's Responsibilities:

A. When a *rating of Below Standard* is given for *any job dimension*, the supervisor must:
   1. Consult with the faculty member about the reason(s) for the poor performance.
   2. Work with the faculty member on a course of action to correct the performance level (see C31.7 UH).
   3. Meet with the faculty member within six months of a *Below Standard* rating to evaluate progress.

B. When the *final overall rating* is *Below Standard*, the supervisor must:
   1. Indicate so in writing to the faculty member.
   2. Indicate, in writing, a suggested course of action to improve the performance of the faculty member.
   3. Meet with the faculty member within six months of a *Below Standard* rating to evaluate the progress.

C. When the *final overall rating* is *Below Standard* for any subsequent annual evaluation following the supervisor's suggested course of action, the supervisor must:

   1. Forward the name of the faculty member to the Dean and Assistant/Associate Dean (and Department Head if supervisor is not same) using the Below Standard Consultation Memo of the unclassified annual evaluation form.

II. Faculty Member's Responsibilities:

A. When a *rating of Below Standard* is given for any job dimension, the faculty member must:
   1. Consult with their supervisor about the reason(s) for the poor performance.
   2. Work with their supervisor on a course of action to correct the performance level (see C31.7 UH).
   3. Meet with their supervisor within six months of a Below Standard rating to evaluate progress.

B. When a faculty member's *final overall rating is Below Standard*, he/she must:
   1. Report to the supervisor and the Dean and Assistant/Associate Dean (and Department Head if supervisor is not same) on activities aimed at improving performance.
   2. Provide evidence of improvement in subsequent annual evaluations.
   3. Meet with their supervisor within six months of a Below Standard rating to evaluate progress.

C. When a faculty member does not want eligible departmental faculty (tenured faculty of equivalent rank or above) to have input into any decision on their case, he/she must so

request via a letter to the Dean. This request must be made within 10 working days following receipt of a letter from the Dean indicating that the faculty member is being reviewed for dismissal under the provisions of C31.5 of the University Handbook.

III. Dean's Responsibilities:

A. When a faculty member has two successive evaluations *Below Standard,* dismissal for cause will be considered at the discretion of the Dean. Within 10 working days of the Dean's receipt of notice from the supervisor (see I.C above), the Dean must notify the faculty member in writing that he/she is being reviewed for dismissal under the provisions of C31.5 of the University Handbook.

The decision whether or not to proceed with dismissal for cause must be conveyed to the faculty member, in writing, within 30 days of the Dean's receipt of the faculty member's letter regarding eligible departmental faculty input (see II.C above).

B. When a faculty member has three evaluations *Below Standard* in five years, dismissal for cause will be considered at the discretion of the Dean. Within 10 working days of the Dean's receipt of notice from the supervisor (see I.C above), the Dean must notify the faculty member in writing that he/she is being reviewed for dismissal under the provisions of C31.5 of the University Handbook.

The decision whether or not to proceed with dismissal for cause must be conveyed to the faculty member, in writing, within 30 days of the Dean's receipt of the faculty member's letter regarding eligible departmental faculty input (see II.C above)

C. The Dean must seek input from eligible departmental faculty (tenured faculty of equivalent rank or above) regarding any decision concerning the faculty member in question unless the faculty member requests otherwise via a letter to the Dean (see II.C above).

Below Standard Consultation Memo

TO: Dean of K-State Libraries
CC: Assistant/Associate Dean of K-State Libraries
CC: Department Head (if not supervisor)

The following unclassified employee's *final overall rating* for evaluation year _____ was BELOW STANDARD.

Faculty member: _____

Supervisor: _____

Date:_____

PART D
PROFESSORIAL PERFORMANCE AWARD

Significance of the Award. The Professorial Performance Award rewards strong performance at the highest rank with a base salary increase in addition to that provided by the annual evaluation process. The Performance Award review, it is important to note, is not a form of promotion review. It does not create a "senior" professoriate. Furthermore, the Professorial Performance Award is not a right accorded to every faculty member at the rank of Professor. Nor is it granted simply as a result of a candidate's routinely meeting assigned duties with a record free of notable deficiencies. (Section C49.1 UH)

Criteria:

1. The candidate must be a full-time professor and have been in rank at least six years since the last promotion or professorial performance award. (Section C49.2 UH)
2. The candidate must show evidence of **sustained** productivity in at least the last six years before the performance review. (Section C49.2 UH)
3. The candidate's productivity and performance must be of a quality comparable to that which would merit promotion to professor according to **current** approved departmental standards. (Section C49.2 UH)
4. In the last six years the candidate must have received a minimum of four annual overall assessments for faculty performance of 'exceptional' or 'exceeds expectations'.

Procedure:

1. The faculty member will provide the following supporting materials which will form the basis of adjudicating eligibility of the award.
   a. Copies of annual evaluations for each year since the last promotion or professorial performance award.
   b. Copy of a current vitae.
2. The Department Head reviews the supporting materials and prepares a written recommendation.
3. The recommendation and supporting materials are forwarded to the Dean and Assistant/Associate Dean of Libraries at the same time as the annual evaluation is forwarded.
4. The Dean of Libraries reviews recommendation and supporting materials and prepares a written recommendation.
5. Approved Professorial Performance Awards are forwarded to the Provost.

PART E

PROCEDURES FOR POST-TENURE REVIEW

Introduction The purpose of post-tenure review at Kansas State University is to enhance the continued professional development of tenured faculty. The process is intended to encourage intellectual vitality and professional proficiency for all members of the faculty throughout their careers, so they may more effectively fulfill the mission of the university. It is also designed to enhance public trust in the university by ensuring that the faculty community undertakes regular and rigorous efforts to hold all of its members accountable for high professional standards.

Kansas State University recognizes that the granting of tenure for university faculty is a vital protection of free inquiry and open intellectual debate. It is expressly recognized that nothing in this policy alters or amends the University's policies regarding removal of tenured faculty members for cause (which are stipulated in the *University Handbook [UH]*). This policy and any actions taken under it are separate from and have no bearing on the chronic low achievement or annual evaluation policies and processes.

The department policy on post-tenure review follows the overarching purpose, principles, objectives, and procedures in the university policy on post-tenure review, which was approved by Faculty Senate on February 11, 2014. (*UH* Appendix W)

Criteria:

1. The faculty member must be a tenured member of the faculty. Post-tenure review will be conducted every six years, or in the sixth year following promotion or awarding of a major university performance award. Certain substantial national or international awards, and the five year review of department heads and administrators may reset the post-tenure review clock. Faculty members who have formally announced their retirement, or have begun phased retirement are exempt from post-tenure review. (*UH* Appendix W Section 2.e.)
2. The faculty member must show evidence of professional competencies of duties appropriately associated with his or her position based on position descriptions and unclassified professional plans in the last six years before the performance review. (*UH* Appendix W Section 1.ii.)

Procedures

1. The faculty member will provide the following supporting materials which will form the basis of the review:
   a. Copies of previous six annual evaluations for each year since tenure, or the last promotion, or major award requiring multi-year portfolio-like documentation.
   b. The Post-Tenure Review Evaluation Form summarizing the six years of evaluation ratings.
2. The supervisor reviews the supporting materials and prepares a written recommendation on the Post-Tenure Review Evaluation Form. At a minimum, the post-tenure review should assess the faculty member's strengths and areas for improvement to determine whether he or she is making appropriate contribution to the University or whether additional plans or activities need to be developed.
3. The faculty member shall be given a copy of the review.
4. The supervisor meets with the faculty member to review the recommendation.
5. The recommendation and supporting materials are forwarded to the Dean of Libraries at the same time the annual evaluation is forwarded.
6. The Dean of Libraries forwards a summary of post-tenure reviews to the Provost.
